Higher Growth Industries

Solutions Focus

Company Profile

Backed by over 40 years' experience, CTG provides information technology (IT) solutions and services to help our clients use technology as a competitive advantage to excel in their markets. CTG combines in-depth understanding of our clients' businesses with a full range of integrated offerings, best practices, and proprietary methodologies supported by an ISO 9001-certified management system. Our IT professionals based in an international network of offices in North America and Europe have a proven track record of delivering high-value, industry-specific solutions. CTG serves companies in several industries and is a leading provider of IT and business consulting solutions to the healthcare market.

Financial Highlights

(amounts in millions, except per-share data)

Operating Data

	2009	2008	2007
Revenue	\$275.6	\$353.2	\$325.3
Operating income	9.9	13.1	6.5
Net income	5.9	7.8	4.2
Basic net income per share	0.40	0.51	0.26
Diluted net income per share	0.38	0.49	0.25

Financial Position

Total assets	\$114.7	\$115.8	\$112.5
Long-term debt	—	—	—
Shareholders' equity	71.7	67.6	65.1

Mission

CTG's mission is to provide IT services and solutions that add real business value to our customers while creating professional opportunities for our employees and value for our shareholders.

Vision

CTG's vision is to be recognized as a leading provider of value-added IT services and solutions in our selected markets.

Dear Fellow Shareholders

In 2009, CTG performed well in the context of a major global recession. While we were clearly challenged by the economy and lower spending for external IT services in 2009, more profitable new solutions work – particularly in our healthcare business – and proactive cost management helped us to significantly reduce the impact of lower revenue on earnings and margins. Revenue for the year was \$275.6 million, 22% less than 2008, with 77% of 2009 revenue coming from North America and 23% from Europe. Net income per diluted share in 2009 was \$0.38, down 22% from \$0.49 in 2008 and 17% excluding a one-time net currency exchange gain of \$0.03 per diluted share in 2008. Notably, the 2009 operating margin was 3.6%, just 10 basis points lower than 2008 despite the decline in revenue. The relative stability of our margin reflects significant improvement in the underlying profitability of CTG's business. Further, despite the weakness in the economy during 2009, CTG's earnings were the second highest in a decade.

While our profitability is certainly not at the level we want it to be, CTG continues to perform better than most of our competitors. We are disciplined in cost control and anticipating a worsening recession in mid-2008, we reduced direct costs and operating expenses by \$71 million over two quarters. We have a strong financial position with no debt and over \$10 million in cash at year-end 2009, along with the ability to finance our working capital needs through a \$35 million revolving credit agreement in place until April 2011. The strength of our cash flow has enabled us to continue funding our share repurchase program and investments in our solutions business without incurring debt. In February 2009, the Board authorized a new one million share repurchase authorization and the Company repurchased 739,000 shares of CTG common stock during the year.

Although the profitability of our solutions work improved in 2009, our business mix did not change significantly from 2008. It was 67% staffing/33% solutions in 2009 compared with 68% staffing/32% solutions in 2008. Both CTG's staffing and solutions businesses began to grow in the 2009 third quarter with headcount increasing and multiple new solution projects awarded.

Our primary growth focus remains on our more profitable solutions business. Further expansion of our solutions business will help us reach 6% to 7% operating margins, a goal we believe can be achieved in three years if the economy continues to steadily recover and spending on healthcare IT increases as expected. The strategy for our staffing business is to continue our focus on managed services where we function as a preferred provider securing and managing high volumes of staffing resources for very large companies with significant IT needs. Our managed services model generates higher margins than the low-volume, placement-only approach to staffing. It also generates significant cash flow for CTG that has funded investments in growing our more profitable solutions business.

Over the last year, CTG's performance received recognition on several fronts. CTG was named in November to *Forbes* America's 200 Best Small Companies of 2009, ranking 131 on the list based on earnings growth, sales growth, and return on equity in the past 12 months and over the last five years. In August, we were ranked as the eighth largest healthcare management consulting company by *Modern Healthcare*. During 2009, CTG was also named to the Top 100 Healthcare IT Providers by *Healthcare Informatics*. In June, CTG was added to the Russell 3000® Index, increasing our visibility with institutional investors. Last year was a very good one for investors in CTG with the price of our shares more than doubling for a year-over-year increase of 149%.

Performance Highlights

- 2009 earnings second highest in a decade
- 2009 operating margins held near 2008 levels on lower revenue
- Healthcare business 27% of total revenue
- Electronic medical records projects 1/3 of healthcare revenue
- Strong balance sheet with \$10 million in cash and no debt at year-end 2009
- Repurchased 4% of average shares outstanding

James R. Boldt
Chairman and Chief Executive Officer

In 2009, we continued to make progress in our strategic focus to advance our position as a leading IT solutions provider to the healthcare market. We have created three unique and innovative solutions that employ data analytics and are targeted to the healthcare industry. We were awarded seven significant electronic medical records (EMR) projects in 2009. EMR work comprised 9% of total revenue last year. Overall, healthcare IT is a very significant part of our business contributing 27% to 2009 revenue.

The EMR Opportunity

For the next several years, EMRs will be CTG's largest growth opportunity. As one of a small number of firms with the experience and capability to support full EMR implementations at the large provider and community-wide level, we are in an excellent position to benefit from this opportunity. In 2009, growth in EMR investments and other major healthcare technology initiatives was constrained as the credit crunch made it difficult for healthcare providers to secure financing for IT investments. That started to subside in the latter part of the year as lenders began to finance EMR implementation projects. With more credit becoming available to healthcare providers, and the unspent \$19 billion in the federal economic stimulus package for EMR implementation incentives, along with another \$40 to \$45 billion in EMR incentives still to come from Medicare and Medicaid, we expect EMR spending will accelerate in 2010 and continue to grow for several years thereafter.

With the EMR opportunity, there is also the challenge we are already seeing in a shortage of IT professionals with the expertise to implement these systems. To ensure we have the qualified talent to capitalize on this enormous opportunity, we developed an EMR training program in 2009 and began the first training classes in the first quarter of 2010. This

comprehensive training program leverages the knowledge of our seasoned EMR consultants to train employees in effective EMR implementation and CTG's proprietary methodologies and tools. Our goal is to provide as many EMR technologists as our clients require in 2010.

Electronic medical records projects were 9% of 2009 revenue.

The Medical Informatics Opportunity

As the mandate to lower healthcare costs builds, providers and payers will be looking beyond EMRs for additional ways to control costs without compromising care. Many in the healthcare industry say it can't be done. We believe that it can be done by applying data analytics to develop medical informatics solutions that identify better treatment models, particularly for serious costly-to-treat illnesses, which comprise a significant portion of all medical expenses.

In 2009, we completed development of our solution that supports medical care management for patients with chronic kidney disease (CKD), one of the most serious and costly-to-treat illnesses. It is proprietary software that analyzes clinical outcomes and claims data for CKD patients. Our solution uses this data to identify treatment intervention points that will result in lower treatment costs and a better quality of life for CKD patients. For health insurers, this tool also assists in determining reimbursement models based on patient complexity and outcomes.

With our medical care management solution now beyond the development phase, in 2010 we will accelerate marketing it to healthcare payers and providers on a national level. Looking further out, we see significant potential for our medical care management tool to improve the effectiveness of treatment of other major high-cost medical conditions. Congestive heart failure, asthma, and orthopedic fractures are next in the queue for expanding the scope of this analytical tool.

In the drive to reduce medical costs, data analytics also offer significant value in analyzing claims data to identify fraud, waste, and abuse (FWA). Our CAMS (Compliance, Auditing and Monitoring Solutions) offering helps health insurers identify and remediate FWA at greater rates than traditional methods. The CAMS application also has the functionality to analyze claims data for healthcare providers to identify remedial actions and reduce penalties for non-compliance associated with audits by Medicare and Medicaid audit contractors.

Our third new offering employs data analytics to provide health insurers with additional business intelligence to more accurately determine group premium rates by accounting for the financial condition and stability of individual groups. Using a company's financial information, as well as other macroeconomic factors, the tool calculates a supplemental risk factor based on the financial condition of the company. This supplemental risk factor, used in conjunction with the payer's underwriting and pricing process, helps payers more equitably price employer groups.

CTG: In the Right Places at the Right Time

Based on the current positive trends in our business and the improving economy, we are confident that 2010 will be a good year for CTG. As a company that primarily sells to large companies and healthcare organizations, CTG is in a favorable position given the expectation that business spending will lead the economy out of the recession to a greater degree than consumer spending. Additionally, our staffing business typically performs well in an economic recovery as the large companies we serve typically prefer to use external IT resources rather than make direct hires until there is strong confidence that the recession is over. We are also fortunate to have a very capable team of IT professionals with the expertise and commitment to support our clients' needs and advance our growth strategy.

Our focus on healthcare IT, higher growth industries, and IT solutions has clearly put CTG in the right places at the right time for the second decade of the 21st century. Technology spending is growing again and that benefits CTG as a leading provider of external IT resources. CTG is very strong in healthcare IT, undoubtedly the fastest growing segment of our entire industry. Certainly EMR initiatives will drive the healthcare IT market for several years and that bodes well for CTG. We are also at the forefront of developing medical informatics solutions and that, combined with accelerating EMR demand, provides us an extraordinary opportunity to significantly increase CTG's business, revenue, and profitability in the years ahead.

2009 Revenue Mix
By Markets

Healthcare is the fastest growing U.S. industry and a very significant part of CTG's business at 27% of 2009 revenue.

James R. Boldt
Chairman and Chief Executive Officer

Electronic Medical Records

As one of the largest healthcare IT consulting firms in the U.S., CTG is in an ideal position to capitalize on the significant and growing demand for electronic medical records (EMR) support. Our favorable visibility in the industry and opportunity to bid on EMR projects is further enhanced by consistently high ratings from KLAS Enterprises, an independent organization that helps healthcare providers evaluate the performance of vendor and professional services firms. As an early entrant in the EMR/HIE (health information exchange) arena, CTG also has the specialized knowledge and experience needed to implement EHR (electronic health records) systems that meet ARRA (American Recovery and Reinvestment Act of 2009) meaningful use criteria while improving the quality and efficiency of clinical care. Reflecting our experience, reputation, and proven methodologies, CTG was newly engaged as a major contributor on 18 significant EMR projects in the last two years.

Integrated Delivery Networks

Over the last 20 years, CTG has provided assessment, implementation, and consulting support to many of the largest integrated delivery networks, as well as more than 100 academic medical centers/teaching institutions.

Large Physician Practices

In the last three years, CTG performed a range of EMR services including ambulatory EMR application system design, build, training, and testing for large physician practices that collectively have over 1,600 physician offices.

Health Information Exchanges

CTG is one of a few U.S. healthcare IT providers with significant experience supporting the formation and implementation of health information exchanges at the regional level.

CTG is currently engaged in 11 large EMR projects. CTG's capabilities cover the full scope of EMR services including assessments, vendor selection, planning, cost analysis, risk mitigation, implementation, application support, and optimization of integrated ambulatory solutions. We also have significant experience in all aspects of computerized physician order entry (CPOE) systems. Our significant experience in all the major healthcare software packages including Allscripts, Cerner, Epic, GE Centricity, McKesson Horizons, MEDITECH, and Siemens further enhances our capabilities in selecting and implementing EMR solutions.

We also bring the perspective of working with large integrated delivery networks, as well as community hospitals (in both the profit and not-for-profit sectors), health insurers, and HIEs. This diverse experience is an important competitive advantage as electronic medical records move toward integrated EHR systems and HIEs where records are shared electronically across an entire environment or community. CTG is also actively engaged with the exchange of patient information in a regional environment through our ongoing involvement with the planning, design, and implementation of a large HIE.

Medical Informatics

Our two medical informatics solutions employ advanced business intelligence software developed by CTG to evaluate large amounts of clinical and claims data and identify best courses of action for providers and payers. CTG's medical care management solution supports improved patient outcomes for serious illnesses while lowering treatment costs. CTG's fraud, waste, and abuse (FWA) solution helps providers and payers identify FWA at higher rates than conventional methods. With healthcare expenditures expected to have exceeded \$2.5 trillion in 2009, which represents over 17% of the projected 2009 GDP (Source: Center for Medicare/Medicaid Services), and three to ten percent of all health expenditures estimated to include FWA, the potential market for these solutions is significant.

Medical Care Management CTG's medical care management offering provides a solution to one of the major challenges facing the healthcare industry: balancing cost and care for patients with serious illnesses. Care management evaluation today still looks primarily at claims data.

Medical Care Management

Our medical care management tool correlates blood chemistry values with patient outcomes over an extended timeframe to identify the best and most cost-effective treatment for serious illnesses.

Fraud, Waste, and Abuse Detection

Our unique knowledge-based solution identifies bona fide patterns for FWA investigation at significantly higher rates than standard random audits and the data mining tools currently on the market.

CTG's solution takes a completely different, more analytical approach that considers costs, treatment, illness complexity, and patient outcomes. Our solution correlates claims with measurable test results (such as blood chemistry) that indicate changes in illness complexity over time for large patient populations with similar illnesses. Implementing this solution will help providers and insurers objectively evaluate medical treatment and contain costs without compromising care, and in many cases, assist providers in improving patient outcomes.

Compliance, Auditing, and Monitoring Solutions Marketed as CTG CAMS (Compliance, Auditing, and Monitoring Solutions), our FWA offering combines advanced business intelligence technology and targeting methodology to build a comprehensive multi-source knowledge base. This knowledge repository enables users of the CAMS software to better identify patterns for investigation, efficiency opportunities, and billing and claims adjudication errors, such as inappropriate treatments, upcoding procedures, and unbundling of tests. In doing so, the CAMS tool significantly lowers losses for payers and Medicare/Medicaid audit penalties for providers.

IT Solutions

Data analytics and knowledge management drive the new breakthrough solutions in medical informatics and health insurance underwriting developed by CTG over the last two years. These proprietary solutions use advanced business intelligence to harness large amounts of data and information to facilitate strategic and operational decision-making that significantly enhances business processes, outcomes, and results. CTG's unique ontology-based knowledge management architecture can also be used to develop future applications for multiple business purposes in several industries we sell into.

Knowledge Management Solutions CTG's approach to knowledge management uses semantic web technologies to enable secure, purposeful sharing of knowledge throughout the client organization. Our knowledge management architecture was originally developed for pharmaceutical industry solutions offered by our life sciences practice.

Knowledge Management

CTG's knowledge management solutions bring a new and powerful perspective to major business challenges of healthcare providers, health insurers, and life sciences companies.

Group Underwriting Intelligence

CTG's leading-edge actuarial underwriting solution uses employer group financial information to support more accurate and equitable pricing.

These solutions enhance research efficiency and the drug discovery and development processes, while shortening the commercialization cycle for new drugs.

The usefulness of our knowledge management architecture extends beyond the life sciences market as demonstrated by our Group Risk Improvement Predictor (GRIP) offering, an actuarial solution targeted to the healthcare payer market. In validating GRIP, CTG used large amounts of data supplied by a major health insurer to prove a direct correlation between the financial condition of a business and the claims experience of that group. Based on financial information about the employer group and macroeconomic data, CTG's GRIP tool applies its proprietary analytical software to calculate a supplemental risk factor for an individual group to be used in conjunction with an insurer's base risk adjustment factor. The GRIP tool enables health insurers to factor the financial risk of individual groups into rate quotes to more accurately and equitably price group premiums.

While healthcare is the major focus of our solutions investments, developing industry-focused, high-value IT solutions for other markets we serve remains an important part of our long-term growth strategy. The most promising of our recent solutions offerings that is not healthcare-focused is CTGTALK™, a multimodal voice picking and placing software primarily targeted to the logistics industry. We also recognize the need to provide solutions that respond to client needs in multiple industries. With regulatory compliance requirements and concerns about protecting information assets rising, we see value for our clients and opportunities for growth in offering a comprehensive suite of security solutions.

Voice Productivity Solutions CTGTALK is a leading-edge, speech-enabled proprietary software solution developed by our logistics solutions practice in 2008. A voice-guided picking and placing system, CTGTALK is used with commercial off-the-shelf hardware.

Security Solutions

CTG's security solutions offerings include a comprehensive suite of assessment services, payment card industry compliance support, and IT governance consulting services that can be sold into several markets we serve.

Best-in-Class Voice Software

CTGTALK offers many advantages over competing products: multimodal functionality, human-quality voices in 30+ languages, superior performance in rigorous environments, and compatibility with virtually all enterprise systems/mobile devices.

It deploys on standard mobile devices and is compatible with virtually all enterprise systems, offering multimodal functionality across a variety of peripherals including bar code scanners, hand-held computers, and radio frequency identification (RFID) devices within a single interface. CTGTALK's flexibility saves users the substantial costs of purchasing and integrating new systems. CTGTALK is currently being used in approximately 200 manufacturing and distribution locations of a major food manufacturer. Compared with traditional bar code scanners, CTGTALK improves worker productivity by 12-15% while enhancing safety by enabling users to work with eyes on task and hands free.

Security Solutions A security issue gaining attention is the risk vulnerability that companies face from vendors with access to information assets, as well as to company premises and equipment. CTG is currently developing a security solution to assess and facilitate vendor risk management that is expected to be launched in 2010. On the regulatory compliance front, a recent development with the potential to increase demand for security solutions in the healthcare market is the ARRA provisions driving electronic exchange of patient information that are affected by HIPAA (Health Insurance Portability and Accountability Act) regulations in terms of expanded liability, audits, and penalties. These changes are likely to cause healthcare providers to revisit HIPAA security to ensure their systems and procedures meet the highest standards.

Technology Services

CTG continues to refine our staffing business model to focus on providing managed services to a select group of high volume clients, primarily major technology service providers and large corporate users of external IT resources. This approach delivers a higher value, customized experience to clients while enhancing the profitability of this business. It also provides a significant revenue stream from financially strong clients while offering opportunities to expand staffing relationships into solutions work.

Under our Managed Services model, CTG performs the full range of functions for clients including recruiting, hiring, deployment, administration, and ongoing management of technical resources. CTG offers the flexibility to operate as an onsite or offsite managed services provider responsible for directly managing and staffing a client group or function. Based on client requirements, CTG provides IT staffing resources for a broad range of functions.

Managed Services Model

Most of our large staffing clients opt for a managed services model that generates higher margins for CTG than the traditional placement-only staffing model.

Prime Supplier

As large users of external IT support continue to reduce their number of approved providers, our client-centered offering helps CTG consistently remain a prime or preferred supplier to our major clients.

High Volume/Low Cost Provider

CTG's ability to deliver high volumes of external IT resources at a low cost on a national level solidifies our strong client relationships with several of the largest and fastest growing users of external IT resources.

These functions include project/program management, application maintenance and enhancement, system implementation and integration, testing/quality assurance, design, engineering, technical writing, infrastructure support, help desk, and web development and maintenance. Our comprehensive solution uses leading-edge technology tools that support recruiting of candidates to profile, technical skills verification, background checks, compliance with all legal requirements, and customized reporting and billing. As major technology service providers that aggregate IT talent for large-scale engagements continue to gain a greater share of external IT spending, CTG's proven ability to support the needs of this group favorably positions us to profitably grow this business.

PART I

Forward-Looking Statements

This annual report on Form 10-K contains forward-looking statements by the management of Computer Task Group, Incorporated (“CTG” or “the Company”) that are subject to a number of risks and uncertainties. These forward-looking statements are based on information as of the date of this report. The Company assumes no obligation to update these statements based on information from and after the date of this report. Generally, forward-looking statements include words or phrases such as “anticipates,” “believes,” “estimates,” “expects,” “intends,” “plans,” “projects,” “could,” “may,” “might,” “should,” “will” and words and phrases of similar impact. The forward-looking statements include, but are not limited to, statements regarding future operations, industry trends or conditions and the business environment, and statements regarding future levels of, or trends in, revenue, operating expenses, capital expenditures, and financing. The forward-looking statements are made pursuant to safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Numerous factors could cause actual results to differ materially from those in the forward-looking statements, including the following: (i) industry and economic conditions, including fluctuations in demand for information technology (IT) services and the further deterioration in market conditions, (ii) the availability to us of qualified professional staff, (iii) domestic and foreign industry competition for customers and talent, (iv) rate and wage inflation or deflation, (v) risks associated with operating in foreign jurisdictions, (vi) the impact of current and future laws and government regulation, as well as repeal or modification of same, affecting the IT solutions and staffing industry, taxes and the Company’s operations in particular, (vii) renegotiations, nullification, or breaches of contracts with customers, vendors, subcontractors or other parties, (viii) consolidation among the Company’s competitors or customers, (ix) the partial or complete loss of the revenue the Company generates from International Business Machines (IBM), (x) the need to supplement or change our IT services in response to new offerings in the industry, and (xi) the risks described in Item 1A of this annual report on Form 10-K and from time to time in the Company’s reports filed with the Securities and Exchange Commission (SEC).

Item 1. *Business*

Overview

Computer Task Group, Incorporated (the Company, CTG, or the Registrant) was incorporated in Buffalo, New York on March 11, 1966, and its corporate headquarters are located at 800 Delaware Avenue, Buffalo, New York 14209 (716-882-8000). CTG is an information technology (IT) solutions and staffing company with operations in North America and Europe. CTG employs approximately 2,900 people worldwide. During 2009, the Company had six operating subsidiaries: Computer Task Group of Canada, Inc., providing services in Canada; and Computer Task Group Belgium N.V., Computer Task Group IT Solutions, S.A., Computer Task Group Luxembourg PSF, Computer Task Group (U.K.) Ltd., and CTG Deutschland GmbH, each primarily providing services in Europe. Services provided in North America are performed by CTG.

Services

The Company operates in one industry segment, providing IT services to its clients. These services include IT Solutions and IT Staffing. CTG provides these primary services to all of the markets that it serves. The services provided typically encompass the IT business solution life cycle, including phases for planning, developing, implementing, managing, and ultimately maintaining the IT solution. A typical

customer is an organization with large, complex information and data processing requirements. The Company's IT Solutions and IT Staffing services are as follows:

- **IT Solutions:** CTG's services in this area include helping clients assess their business needs and identifying the right IT solutions to meet these needs, the delivery of services that include the selection and implementation of packaged software and the design, development, testing, and integration of new systems, and the development and implementation of customized software and solutions designed to fit the needs of a specific client or vertical market.

Generally, IT Solutions services include taking responsibility for the deliverables on a project and may include high-end consulting services. In 2008 and 2009, CTG continued to invest in new IT Solutions development, primarily targeted to the healthcare market, and largely to support cost reductions and productivity improvements. In 2009, several healthcare solutions under development moved to the pilot stage of testing using live data. The Company continues to modify and further develop these solutions. These solutions include medical care and disease management, group underwriting risk assessment, and medical fraud, waste, and abuse detection and reduction. The Company is developing proprietary software to support these offerings which expands the potential market for sale and support of these solutions. CTG expects to begin commercial marketing of these solutions in 2010. These solutions support both the healthcare provider and payer markets.

Additionally, the Company began providing services to assist in the start-up and development of Health Information Exchanges (HIEs). HIEs are consortiums of providers, payers, and government agencies at the local level that are charged with implementing secure communitywide electronic medical records. CTG also has significant experience in implementing electronic medical records (EMR) systems in integrated delivery networks and other provider organizations. CTG's experience in supporting EMR systems and the formation of HIEs favorably positions the Company as demand for these services increases.

Independent software testing is a common practice in western Europe and represents a significant portion of the solutions business of CTG's European operations. In response to growing demand for independent software testing in the United States, driven in part by outsourced software development, CTG adapted the proprietary testing methodology and solution developed by its European business for the American market. This comprehensive testing offering supports IT environments across multiple industries.

Also included in IT Solutions is Application Management Outsourcing (AMO). CTG's services in this area typically include support of single or multiple applications and help desk functions. Depending on client needs, AMO engagements are performed at client sites or CTG sites. In 2009, the healthcare market accounted for most of CTG's AMO business with a significant portion of this business involving transitional outsourced support. In a transitional outsourcing engagement, the client hires CTG to manage an application for an extended time period, typically ranging from one to three years, while its internal IT staff focuses on implementation of a new application replacing the application being phased out.

- **IT Staffing:** CTG recruits, retains, and manages IT talent for its clients, which are primarily large technology service providers and companies with multiple locations and significant need for high-volume external IT resources. The Company also supports larger companies and organizations that need to augment their own IT staff on a flexible basis. Our clients may require the services of our IT talent on a temporary or long-term basis. Our IT professionals generally work with the client's internal IT staff at client sites. Our recruiting organization works with customers to define their staffing requirements and develop competitive pricing to meet their requirement.

The primary focus of the Company's staffing business is a managed services model that provides large clients with higher value support through cost-effective supply models

customized to client needs, resource management support, vendor management programs, and a highly automated recruiting process and system with global reach.

A trend affecting the staffing industry in recent years is that large users of external technology support are reducing their number of approved suppliers to fewer firms with a preference for those firms able to fulfill high volume requirements at competitive rates and to locate resources with specialized skills on a national level. CTG's staffing business model fits this profile and it has consistently remained a preferred provider with large technology services providers and users that have reduced their lists of approved IT staffing suppliers.

IT solutions and staffing revenue as a percentage of total revenue for the years ended December 31, 2009, 2008 and 2007 is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
IT solutions	33%	32%	34%
IT staffing	67%	68%	66%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

In recent years, a major strategic focus of the Company has been to increase the total amount of revenue from its IT solutions business and the percentage of solutions revenue to total revenue as operating margins generated by its solutions business are generally significantly higher than those of its staffing business. Overall, the Company's revenue decreased \$77.6 million or 22% from 2008 to 2009 due to very challenging worldwide economic conditions which led to a significant slowdown in our business. The higher margin solutions business decreased \$22.9 million or 20.0% from 2008 to 2009, or at a rate lower than the decrease in the Company's overall revenue. The Company's operating margin in 2009 was 3.6%, which was the second highest level since 1999. The Company's operating margin in 2008 was 3.7%.

Vertical Markets

The Company promotes a majority of its services through four vertical market focus areas: Technology Service Providers, Healthcare (which includes services provided to healthcare providers, health insurers, and life sciences companies), Energy, and Financial Services. The remainder of CTG's revenue is derived from general markets.

CTG's revenue by vertical market for the years ended December 31, 2009, 2008 and 2007 is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Technology service providers	31%	34%	34%
Healthcare	27%	27%	27%
Energy	8%	6%	5%
Financial services	8%	9%	11%
General markets	26%	24%	23%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

The Company's growth efforts are primarily focused on the healthcare market based on its leading position in serving the provider market, its expertise and experience serving all segments of this market (providers, payers and life sciences companies), higher demand for solutions offerings and support from healthcare companies, and the greater relative strength of this sector compared with other sectors of the U.S. economy. The Company's healthcare revenue decreased by \$23.2 million or 24.0% from

2008 to 2009, again due to the very challenging economic conditions which the company experienced in each of the markets in which it serves.

Over the last three years, the contribution of the financial services market to CTG's total revenue declined primarily based on greater use of offshore support and lower overall demand in this sector due to the global economic recession. In recent years, most of CTG's revenue in the financial services market was generated by its European operations. In 2009, less than 13% of CTG's revenue from the financial services market was generated in the United States.

International Business Machines Corporation (IBM) is CTG's largest customer. CTG provides services to various IBM divisions in many locations. During the second quarter of 2008, the Company and IBM agreed to extend the current National Technical Services ("NTS Agreement") contract until July 1, 2011. As part of the NTS Agreement, the Company also provides its services as a predominant supplier to IBM's Integrated Technology Services unit and as the sole provider to the Systems and Technology Group business unit. Services provided under these agreements accounted for approximately 95% of all of the services provided to IBM by the Company in 2009. In 2009, 2008, and 2007, IBM accounted for \$71.2 million or 25.8%, \$108.3 million or 30.6%, and \$96.0 million or 29.5% of the Company's consolidated revenue, respectively. No other customer accounted for more than 10% of the Company's revenue in 2009, 2008 or 2007.

In 2009, CTG provided IT services to approximately 400 clients in North America and Europe. In North America, the Company operates in the United States and Canada with greater than 99% of 2009 revenue from North America generated in the United States. In Europe, the Company operates in Belgium, Luxembourg, Germany, and the United Kingdom. Of total 2009 consolidated revenue of \$275.6 million, approximately 77% was generated in North America and 23% in Europe.

Pricing and Backlog

The Company recognizes revenue when persuasive evidence of an arrangement exists, when the services have been rendered, when the price is determinable, and when collectibility of the amounts due is reasonably assured. For time-and-material contracts, revenue is recognized as hours are incurred and costs are expended. For contracts with periodic billing schedules, primarily monthly, revenue is recognized as services are rendered to the customer. Revenue for fixed-price contracts is recognized as per the proportional method of accounting using an input-based approach whereby salary and indirect labor costs incurred are measured and compared with the total estimate of costs at completion for a project. Revenue is recognized based upon the percentage-of-completion calculation of total incurred costs to total estimated costs. The Company infrequently works on fixed-price projects that include significant amounts of material or other non-labor related costs which could distort the percent complete within a percentage-of-completion calculation. The Company's estimate of the total labor costs it expects to incur over the term of the contract is based on the nature of the project and our past experience on similar projects, and includes management judgments and estimates which affect the amount of revenue recognized on fixed-price contracts in any accounting period.

The Company's revenue from contracts accounted for under time-and-material, progress billing, and percentage-of-completion methods for the years ended December 31, 2009, 2008 and 2007 is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Time-and-material	91%	90%	88%
Progress billing	7%	7%	8%
Percentage-of-completion	2%	3%	4%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

As of December 31, 2009 and 2008, the backlog for fixed-price and all managed-support contracts was approximately \$19.9 million and \$25.0 million, respectively. Approximately 90.5% or \$18.0 million of the December 31, 2009 backlog is expected to be earned in 2010. Of the \$25.0 million of backlog at December 31, 2008, approximately 72.6%, or \$18.1 million was earned in 2009. Revenue is subject to seasonal variations, with a minor slowdown in months of high vacation and legal holidays (July, August, and December). Backlog does not tend to be seasonal; however, it does fluctuate based upon the timing of entry into long-term contracts.

Competition

The IT services market is highly competitive. The market is also highly fragmented with many providers with no single competitor maintaining clear market leadership. Competition varies by location, the type of service provided, and the customer to whom services are provided. The Company's competition comes from four major channels: large national or international vendors, including major accounting and consulting firms; hardware vendors and suppliers of packaged software systems; small local firms or individuals specializing in specific programming services or applications; and a customer's internal data processing staff. CTG competes against all four of these channels for its share of the market. The Company believes that to compete successfully it is necessary to have a local geographic presence, offer appropriate IT solutions, provide skilled professional resources, and price its services competitively.

CTG has implemented a Global Management System, with the goal to achieve continuous, measured improvements in services and deliverables. As part of this program, CTG has developed specific methodologies for providing high value services that result in unique solutions and specified deliverables for its clients. The Company believes these methodologies will enhance its ability to compete. CTG initially achieved worldwide ISO 9001:1994 certification in June 2000. CTG received its worldwide ISO 9001:2000 certification in January 2003. The Company believes it is the only IT services company of its size to achieve worldwide certification.

Intellectual Property

The Company has registered its symbol and logo with the U.S. Patent and Trademark Office and has taken steps to preserve its rights in other countries where it operates. CTG has entered into agreements with various software and hardware vendors from time to time in the normal course of business, and has capitalized certain costs under software development projects.

Employees

CTG's business depends on the Company's ability to attract and retain qualified professional staff to provide services to its customers. The Company has a structured recruiting organization that works with its clients to meet their requirements by recruiting and providing high quality, motivated staff. The Company employs approximately 2,900 employees worldwide, with approximately 2,400 in the United States and Canada and 500 in Europe. Of these, approximately 2,600 are IT professionals and 300 are individuals who work in sales, recruiting, delivery, administrative and support positions. The Company believes that its relationship with its employees is good. No employees are covered by a collective bargaining agreement or are represented by a labor union. CTG is an equal opportunity employer.

Financial Information Relating to Foreign and Domestic Operations

The following table sets forth certain financial information relating to the performance of the Company for the years ended December 31, 2009, 2008, and 2007. This information should be read in conjunction with the audited consolidated financial statements and notes thereto included in Item 8, "Financial Statements and Supplementary Data" included in this report.

	<u>2009</u>	<u>2008</u>	<u>2007</u>
(amounts in thousands)			
Revenue from External Customers:			
United States	\$211,265	\$272,242	\$250,097
Belgium ⁽¹⁾	42,326	53,773	46,499
Other European countries	20,418	24,437	25,598
Other countries	1,551	2,761	3,091
Total revenue	<u>\$275,560</u>	<u>\$353,213</u>	<u>\$325,285</u>
Operating Income (Loss):			
United States	\$ 8,342	\$ 11,128	\$ 4,814
Europe	1,527	2,033	1,897
Other countries	20	(79)	(187)
Total operating income	<u>\$ 9,889</u>	<u>\$ 13,082</u>	<u>\$ 6,524</u>
Total Assets:			
United States	\$ 89,015	\$ 87,142	\$ 80,619
Europe	25,007	27,901	31,085
Other countries	700	797	757
Total assets	<u>\$114,722</u>	<u>\$115,840</u>	<u>\$112,461</u>

(1) Revenues for Belgium have been disclosed separately as they exceeded 10% of our consolidated revenues for the years presented.

Executive Officers of the Company

As of December 31, 2009, the following individuals were executive officers of the Company:

<u>Name</u>	<u>Age</u>	<u>Office</u>	<u>Period During Which Served as Executive Officer</u>	<u>Other Positions and Offices with Registrant</u>
James R. Boldt	58	Chairman, President and Chief Executive Officer	June 21, 2001 for President, July 16, 2001 for Chief Executive Officer, May 2002 for Chairman, all to date	Director
		Executive Vice President	February 2001 to June 2001	
		Vice President, Strategic Staffing	December 2000 to September 2001	
		Acting Chief Executive Officer	June 2000 to November 2000	
		Vice President and Chief Financial Officer	February 12, 1996 to October 1, 2001	
Michael J. Colson	47	Senior Vice President	January 3, 2005 to date	None
Arthur W. Crumlish	55	Senior Vice President	September 24, 2001 to date	None
Filip J.L. Gyde	49	Senior Vice President	October 1, 2000 to date	None
Brendan M. Harrington . . .	43	Senior Vice President, Chief Financial Officer	September 13, 2006 to date	None
		Interim Chief Financial Officer	October 17, 2005 to September 12, 2006	None
Thomas J. Niehaus	47	Senior Vice President	July 22, 1999 to date	None
Peter P. Radetich	55	Senior Vice President, General Counsel	April 28, 1999 to date	Secretary

Mr. Boldt was appointed President and joined CTG's Board of Directors on June 21, 2001, and was appointed Chief Executive Officer on July 16, 2001. Mr. Boldt became the Company's Chairman in May 2002. Mr. Boldt joined the Company as a Vice President and its Chief Financial Officer and Treasurer in February 1996.

Mr. Colson joined the Company as Senior Vice President of Solutions Development in January 2005. Prior to that, Mr. Colson was Chief Executive Officer of Manning and Napier Information Services, a software and venture capital firm from September 1998 until the time he joined CTG.

Mr. Crumlish was promoted to Senior Vice President in September 2001, and is currently responsible for the Company's Strategic Staffing Services organization. Prior to that, Mr. Crumlish was Controller of the Company's Strategic Staffing Services organization. Mr. Crumlish joined the Company in 1990.

Mr. Gyde was promoted to Senior Vice President in October 2000, at which time he assumed responsibility for all of the Company's European operations. Prior to that, Mr. Gyde was Managing Director of the Company's Belgium operation. Mr. Gyde has been with the Company since May 1987.

Mr. Harrington was promoted to Senior Vice President and Chief Financial Officer on September 13, 2006. Previously he was Interim Chief Financial Officer and Treasurer from October 17, 2005 to September 12, 2006. Mr. Harrington joined the Company in February 1994 and served in a number of managerial financial positions in the Company's corporate and European operations, including as the Director of Accounting since 2003, before being appointed Corporate Controller in May 2005.

Mr. Niehaus joined the Company in February 1999, and was promoted to Senior Vice President of CTG HealthCare Solutions in July 1999. Previously, Mr. Niehaus was Executive Vice President of Elumen Solutions, Inc. from September 1997 to February 1999. Prior to that, Mr. Niehaus was Vice President of Exemplar Systems.

Mr. Radetich joined the Company in June 1988 as Associate General Counsel, and was promoted to General Counsel and Secretary in April 1999.

Available Company Information

The Company's annual reports on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and all amendments to those reports filed or furnished pursuant to Section 13(a) or 15(d) of the Securities Exchange Act of 1934 (Exchange Act), and reports pertaining to the Company filed under Section 16 of the Exchange Act are available without charge on the Company's website at www.ctg.com as soon as reasonably practicable after the Company electronically files the information with, or furnishes it to, the SEC. The Company's code of ethics, committee charters and governance policies are also available without charge on the Company's website at www.ctg.com/investors/corporategov.htm.

Item 1A. Risk Factors

We operate in a dynamic and rapidly changing environment that involves numerous risks and uncertainties. The following section describes some, but not all, of the risks and uncertainties that could have a material adverse effect on our business, financial condition, results of operations and the market price of our common stock, and could cause our actual results to differ materially from those expressed or implied in our forward-looking statements.

Decreases in demand for information technology (IT) solutions and staffing services in the future would cause an adverse effect on our revenue and operating results.

The Company's revenue and operating results are significantly affected by changes in demand for its services. During 2008 and 2009, the U.S. economy, where the Company performed greater than 77% of its total business based upon revenue, significantly deteriorated primarily due to subprime mortgage issues, financial market conditions, and other economic concerns. In 2009, these economic pressures have also extended to the European markets where the Company operates. These negative pressures on the economy have led to a worldwide contraction of the credit markets, more severe recessionary conditions, and a decline in demand for the Company's services which negatively affected the Company's revenue and operating results in 2009 as compared with 2008. Economic pressures also led to customers' reducing their spending on IT projects and external professional services. Further declines in spending for IT services in 2010 or future years may additionally adversely affect our operating results in the future as they have in the past.

Our business depends on a large number of highly qualified professionals and if we are not able to recruit and retain a sufficient number of these professionals, we would not be able to provide high quality services to our current and future customers, which would have an adverse effect on our revenue and operating results.

We actively compete with many other IT service providers for qualified professional staff. The availability or lack thereof of qualified professional staff may affect our ability to provide services and meet the needs of our customers in the future. An inability to fulfill customer requirements at agreed upon rates due to a lack of available qualified staff may adversely impact our revenue and operating results in the future.

Increased competition and the bargaining power of our large customers may cause our billing rates to decline, which would have an adverse effect on our revenue and, if we are unable to control our personnel costs accordingly, our margins and operating results.

We have experienced several reductions in the rates at which we bill for services to some of our larger customers during previous highly competitive business markets. Additionally, we actively compete against many other companies for business with new and existing clients. Bill rate reductions or competitive pressures, if we are unable to make commensurate reductions in our personnel costs, may lead to a decline in revenue or the rates we bill our customers for services, which may adversely affect our margins and operating results in the future.

The currency, legislative, tax, regulatory and economic risks associated with international operations could have an adverse effect on our operating results if we are unable to mitigate or hedge these risks.

We have operations in the United States and Canada in North America, and in Belgium, the United Kingdom, Luxembourg and Germany in Europe. Although our foreign operations conduct their business in their local currencies, these operations are subject to currency fluctuations. Each of our

operations is subject to its own legislation, employment and tax law changes, and economic climates. These factors relating to our foreign operations are different than those of the United States. Although we actively manage these foreign operations with local management teams, our overall operating results may be negatively affected by economic conditions, changes in foreign currency exchange rates or tax, regulatory or other economic changes beyond our control.

We derive a significant portion of our revenue from a single customer and a significant reduction in the amount of IT services requested by this customer would have an adverse effect on our revenue and operating results.

IBM is CTG's largest customer. CTG provides services to various IBM divisions in many locations. In 2009, 2008, and 2007, IBM accounted for \$71.2 million or 25.8%, \$108.3 million or 30.6%, and \$96.0 million or 29.5% of the Company's consolidated revenue, respectively. No other customer accounted for more than 10% of the Company's revenue in 2009, 2008 or 2007. The Company's accounts receivable from IBM at December 31, 2009 and 2008 amounted to \$9.7 million and \$8.5 million, respectively.

The IT services industry is highly competitive and fragmented, which means that our customers have a number of choices for providers of IT services and we may not be able to compete effectively.

The market for our services is highly competitive. The market is fragmented, and no company holds a dominant position. Consequently, our competition for client requirements and experienced personnel varies significantly by geographic area and by the type of service provided. Some of our competitors are larger and have greater technical, financial, and marketing resources and greater name recognition than we have in the markets we collectively serve. In addition, clients may elect to increase their internal IT systems resources to satisfy their custom software development and integration needs. Finally, our industry is being impacted by the growing use of lower-cost offshore delivery capabilities (primarily India and Asia). There can be no assurance that we will be able to continue to compete successfully with existing or future competitors or that future competition will not have a material adverse effect on our results of operations and financial condition.

Changes in government regulations and laws affecting the IT services industry, including accounting principles and interpretations and the taxation of domestic and foreign operations, could adversely affect our results of operations.

Changing laws, regulations and standards relating to corporate governance and public disclosure, including the Sarbanes-Oxley Act of 2002 and new SEC regulations, are creating uncertainty for companies such as ours. These new or changed laws, regulations and standards are subject to varying interpretations which, in many instances, is due to their lack of specificity. As a result, the application of these new standards and regulations in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices. We are committed to maintaining high standards of corporate governance and public disclosure. As a result, our efforts to comply with evolving laws, tax regulations and other standards have resulted in, and are likely to continue to result in, increased general and administrative expenses and a diversion of management time and attention from revenue-generating activities to compliance activities. In particular, our efforts to comply with Section 404 of the Sarbanes-Oxley Act of 2002 and the related regulations regarding our required assessment of our internal controls over financial reporting and our independent auditors' audit of internal control have required the commitment of significant internal, financial and managerial resources.

The Financial Accounting Standards Board (FASB), the SEC, and the Public Company Accounting Oversight Board (PCAOB) or other accounting rulemaking authorities may issue new accounting rules or standards that are different than those that we presently apply to our financial results. Such new accounting rules or standards could require significant changes from the way we currently report our financial condition, results of operations or cash flows.

U.S. generally accepted accounting principles have been the subject of frequent changes in interpretations. As a result of the enactment of the Sarbanes-Oxley Act of 2002 and the review of accounting policies by the SEC as well as by national and international accounting standards bodies, the frequency of future accounting policy changes may accelerate. Such future changes in financial accounting standards may have a significant effect on our reported results of operations, including results of transactions entered into before the effective date of the changes.

We are subject to income and other taxes in the United States (federal and state) and numerous foreign jurisdictions. Our provisions for income and other taxes and our tax liabilities in the future could be adversely affected by numerous factors including, but not limited to, income before taxes being lower than anticipated in countries with lower statutory tax rates and higher than anticipated in countries with higher statutory tax rates, changes in the valuation of deferred tax assets and liabilities, and changes in various federal, state and international tax laws, regulations, accounting principles or interpretations thereof, which could adversely impact our financial condition, results of operations and cash flows in future periods.

Our customer contracts generally have a short term or are terminable on short notice and a significant number of failures to renew contracts, early terminations or renegotiations of our existing customer contracts could adversely affect our results of operations.

Our clients typically retain us on a non-exclusive, engagement-by-engagement basis, rather than under exclusive long-term contracts. We performed approximately 91% of our services on a time-and-materials basis during 2009. As such, our customers generally have the right to terminate a contract with us upon written notice without the payment of any financial penalty. Client projects may involve multiple engagements or stages, and there is a risk that a client may choose not to retain us for additional stages of a project or that a client will cancel or delay additional planned engagements. These terminations, cancellations or delays could result from factors that are beyond our control and are unrelated to our work product or the progress of the project, but could be related to business or financial conditions of the client, changes in client strategies or the economy in general. When contracts are terminated, we lose the anticipated future revenue and we may not be able to eliminate the associated costs in a timely manner. Consequently, our operating results in subsequent periods may be lower than expected. Our clients can cancel or reduce the scope of their engagements with us on short notice. If they do so, we may be unable to reassign our professionals to new engagements without delay. The cancellation or reduction in scope of an engagement could, therefore, reduce the utilization rate of our professionals, which would have a negative impact on our business, financial condition, and results of operations. As a result of these and other factors, our past financial performance should not be relied on as a guarantee of similar or better future performance. Due to these factors, we believe that our results of operations may fluctuate from period to period in the future.

The introduction of new IT products or services may render our existing IT Solutions or IT Staffing offerings to be obsolete, which, if we are unable to keep pace with these corresponding changes, could have an adverse effect on our business.

Our success depends, in part, on our ability to implement and deliver IT Solutions or IT Staffing services that anticipate and keep pace with rapid and continuing changes in technology, industry standards and client preferences. We may not be successful in anticipating or responding to these

developments on a timely basis, and our offerings may not be successful in the marketplace. Also, services, solutions and technologies developed by our competitors may make our solutions or staffing offerings uncompetitive or obsolete. Any one of these circumstances could have a material adverse effect on our ability to obtain and successfully complete client engagements.

Existing and potential customers may outsource or consider outsourcing their IT requirements to foreign countries in which we may not currently have operations, which could have an adverse effect on our ability to obtain new customers or retain existing customers.

In the past few years, more companies are using or are considering using low cost offshore outsourcing centers to perform technology-related work and complete projects. Currently, we have partnered with clients to perform services in Russia to mitigate and reduce this risk to our Company. However, the risk of additional increases in the future in the outsourcing of IT solutions overseas could have a material, negative impact on our future operations.

A significant portion of our total assets consists of goodwill, which is subject to a periodic impairment analysis and a significant impairment determination in any future period could have an adverse effect on our results of operations even without a significant loss of revenue or increase in cash expenses attributable to such period.

We have goodwill totaling approximately \$35.7 million at December 31, 2009 resulting from our acquisition of Elumen Solutions, Inc. (Elumen) in early 1999. Elumen provided IT services to healthcare and related companies, and was merged with the Company's existing staff which also served the healthcare industry. At least annually, we evaluate this goodwill for impairment based on the fair value of the business operations to which this goodwill relates. This estimated fair value could change if there is a significant decrease in the enterprise value of CTG, if we are unable to achieve operating results at the levels that have been forecasted, the market valuation of such companies decreases based on transactions involving similar companies which could occur given the recent economic downturn in the countries in which the Company operates, or there is a permanent, negative change in the market demand for the services offered by this business unit. These changes could result in an impairment of the existing goodwill balance that could require a material non-cash charge which would have an adverse impact on our results of operations.

Changing economic conditions and the affect of such changes on accounting estimates could have a material impact on our results of operations.

The Company has also made a number of estimates and assumptions relating to the reporting of its assets and liabilities and the disclosure of contingent assets and liabilities to prepare its consolidated financial statements pursuant to the rules and regulations of the SEC and other accounting rulemaking authorities. Such estimates primarily relate to the valuation of goodwill, the valuation of stock options for recording equity-based compensation expense, allowances for doubtful accounts receivable, investment valuation, legal matters, other contingencies and estimates of progress toward completion and direct profit or loss on contracts, as applicable. As future events and their affects can not be determined with precision, actual results could differ from these estimates. Changes in the economic climates in which the Company operates may affect these estimates and will be reflected in the Company's financial statements in the event they occur. Such changes could result in a material impact on the Company's results of operations.

Item 1B. *Unresolved Staff Comments*

None.

Item 2. *Properties*

The Company owns and occupies a headquarters building at 800 Delaware Avenue, and an office building at 700 Delaware Avenue, both located in Buffalo, New York, operated by CTG of Buffalo, a subsidiary of the Company which is part of the Company's North American operations. The corporate headquarters consists of approximately 40,000 square feet and is occupied by corporate administrative operations. The office building consists of approximately 39,000 square feet and is also occupied by corporate administrative operations. At December 31, 2009, these properties were not mortgaged as part of the Company's existing revolving credit agreement.

The remainder of the Company's locations are leased facilities. Most of these facilities serve as sales and support offices and their size varies, generally in the range from 250 to 13,200 square feet, with the number of people employed at each office. The Company's lease terms generally vary from periods of less than a year to five years and typically have flexible renewal options. The Company believes that its present owned and leased facilities are adequate to support its current and anticipated future needs.

Item 3. *Legal Proceedings*

The Company and its subsidiaries are involved from time to time in various legal proceedings arising in the ordinary course of business. Although the outcome of lawsuits or other proceedings involving the Company and its subsidiaries cannot be predicted with certainty and the amount of any liability that could arise with respect to such lawsuits or other proceedings cannot be predicted accurately, management does not expect these matters, if any, to have a material adverse effect on the financial position, results of operations, or cash flows of the Company.

Item 4. *Submission of Matters to a Vote of Security Holders*

There were no matters submitted to a vote of security holders in the fourth quarter of 2009.

PART II

Item 5. *Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities*

Stock Market Information

The Company's common stock is traded on The NASDAQ Stock Market LLC under the symbol CTGX. The following table sets forth the high and low sales prices for the Company's common stock for each quarter of the previous two years.

Stock Price	High	Low
Year ended December 31, 2009		
Fourth Quarter	\$8.43	\$6.00
Third Quarter	\$8.50	\$5.72
Second Quarter	\$6.88	\$3.40
First Quarter	\$4.05	\$2.72
Year ended December 31, 2008		
Fourth Quarter	\$7.06	\$2.46
Third Quarter	\$7.33	\$4.20
Second Quarter	\$5.50	\$4.03
First Quarter	\$5.76	\$3.75

On February 18, 2010, there were 1,867 record holders of the Company's common shares. The Company has not paid a dividend since 2000. The Company is required to meet certain financial covenants under its current revolving credit agreement in order to pay dividends. The Company was in compliance with these financial covenants at each of December 31, 2007, 2008 and 2009. The determination of the timing, amount and payment of dividends on the Company's common stock in the future is at the discretion of the Board of Directors and will depend upon, among other things, the Company's profitability, liquidity, financial condition, capital requirements and compliance with the aforementioned financial covenants.

For information concerning common stock issued in connection with the Company's equity compensation plans, see Item 12, "Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters."

Issuer Purchases of Equity Securities

The Company has one share repurchase program. During both February 2008 and 2009, the Company's Board of Director's authorized 1.0 million additional shares (2.0 million shares total) for future stock repurchases under this program. The share repurchase program does not have an expiration date, nor was it terminated during the fourth quarter of 2009.

Purchases by the Company of its common stock during the fourth quarter ended December 31, 2009 are as follows:

<u>Period</u>	<u>Total Number of Shares Purchased</u>	<u>Average Price Paid per Share</u>	<u>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</u>	<u>Maximum Number of Shares that may yet be Purchased Under the Plans or Programs</u>
October 3 – October 31	12,707	\$7.45	12,707	635,454
November 1 – November 30	56,460	\$6.79	56,460	578,994
December 1 – December 31	29,199	\$7.06	29,199	549,795
Total	<u>98,366</u>	<u>\$6.96</u>	<u>98,366</u>	<u>549,795</u>

Company Performance Graph

The following graph displays a five-year comparison of cumulative total shareholder returns for the Company's common stock, the S&P 500 Index, and the Dow Jones U.S. Computer Services Index, assuming a base index of \$100 at the end of 2004. The cumulative total return for each annual period within the five years presented is measured by dividing (1) the sum of (A) the cumulative amount of dividends for the period, assuming dividend reinvestment, and (B) the difference between the Company's share price at the end and the beginning of the period by (2) the share price at the beginning of the period. The calculations were made excluding trading commissions and taxes.

	Base Period	INDEXED RETURNS Years Ending					
	Dec 04	Dec 05	Dec 06	Dec 07	Dec 08	Dec 09	
Computer Task Group, Inc.	\$100.00	\$ 70.54	\$ 84.82	\$ 98.75	\$57.50	\$143.04	
S&P 500 Index	\$100.00	\$104.91	\$121.48	\$128.16	\$80.74	\$102.11	
Dow Jones U.S. Computer Services Index . . .	\$100.00	\$ 88.37	\$105.19	\$114.05	\$85.90	\$138.12	

The information included under this section entitled "Company Performance Graph" is deemed not to be "soliciting material" or "filed" with the SEC, is not subject to the liabilities of Section 18 of the Exchange Act of 1934, as amended (Exchange Act), and shall not be deemed incorporated by reference into any of the filings previously made or made in the future by our company under the Exchange Act or the Securities Act of 1933, except to the extent the Company specifically incorporates any such information into a document that is filed.

Item 6. Selected Financial Data**Consolidated Summary—Five-Year Selected Financial Information**

The selected operating data and financial position information set forth below for each of the years in the five-year period ended December 31, 2009 has been derived from the Company's audited consolidated financial statements. This information should be read in conjunction with the audited consolidated financial statements and notes thereto included in Item 8, "Financial Statements and Supplementary Data" included in this report.

	<u>2009</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>	<u>2005</u>
(amounts in millions, except per-share data)	(1)	(1, 2)	(1, 2)	(1)	
Operating Data					
Revenue	\$275.6	\$353.2	\$325.3	\$327.3	\$294.5
Operating income	\$ 9.9	\$ 13.1	\$ 6.5	\$ 6.9	\$ 4.9
Net income	\$ 5.9	\$ 7.8	\$ 4.2	\$ 3.5	\$ 2.4
Basic net income per share	\$ 0.40	\$ 0.51	\$ 0.26	\$ 0.21	\$ 0.14
Diluted net income per share	\$ 0.38	\$ 0.49	\$ 0.25	\$ 0.21	\$ 0.14
Cash dividend per share	\$ —	\$ —	\$ —	\$ —	\$ —
Financial Position					
Working capital	\$ 25.8	\$ 24.8	\$ 23.2	\$ 21.7	\$ 40.3
Total assets	\$114.7	\$115.8	\$112.5	\$111.7	\$128.3
Long-term debt	\$ —	\$ —	\$ —	\$ —	\$ 23.2
Shareholders' equity	\$ 71.7	\$ 67.6	\$ 65.1	\$ 61.6	\$ 57.5

- (1) As required by accounting standards, in 2006 the Company began to record equity-based compensation expense and the related tax benefit in its consolidated statements of operations as selling, general and administrative expenses. These amounts for 2009, 2008, 2007 and 2006 are as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>	<u>2006</u>
(amounts in millions)				
Equity-based compensation	\$1.4	\$1.0	\$0.9	\$0.9
Tax benefit	0.5	0.4	0.3	0.3
Net expense	<u>\$0.9</u>	<u>\$0.6</u>	<u>\$0.6</u>	<u>\$0.6</u>

For additional information regarding equity-based compensation expense, see note 9 to the consolidated financial statements in Item 8, "Financial Statements and Supplementary Data" included in this report.

- (2) During 2007, the Company received two unsolicited merger proposals from RCM Technologies, Inc. After consideration of the proposals, the Company's Board of Directors unanimously determined that the proposals were inadequate and did not reflect the value inherent in CTG's business and the Company's potential growth opportunities. In 2008 and 2007, included in operating income, the Company recorded \$0.2 million and \$0.7 million, respectively, related to advisory fees incurred in conjunction with its consideration of the two unsolicited merger proposals.

Item 7. *Management's Discussion and Analysis of Financial Condition and Results of Operation*

Forward-Looking Statements

This management's discussion and analysis of financial condition and results of operations contains forward-looking statements by management and Computer Task Group, Incorporated ("CTG" or "the Company") that are subject to a number of risks and uncertainties. These forward-looking statements are based on information as of the date of this report. The Company assumes no obligation to update these statements based on information from and after the date of this report. Generally, forward-looking statements include words or phrases such as "anticipates," "believes," "estimates," "expects," "intends," "plans," "projects," "could," "may," "might," "should," "will" and words and phrases of similar impact. The forward-looking statements include, but are not limited to, statements regarding future operations, industry trends or conditions and the business environment, and statements regarding future levels of, or trends in, revenue, operating expenses, capital expenditures, and financing. The forward-looking statements are made pursuant to safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Numerous factors could cause actual results to differ materially from those in the forward-looking statements, including the following: (i) industry and economic conditions, including fluctuations in demand for information technology (IT) services and the further deterioration in market conditions, (ii) the availability to us of qualified professional staff, (iii) domestic and foreign industry competition for customers and talent, (iv) rate and wage inflation or deflation, (v) risks associated with operating in foreign jurisdictions, (vi) the impact of current and future laws and government regulation, as well as repeal or modification of same, affecting the IT solutions and staffing industry, taxes and the Company's operations in particular, (vii) renegotiations, nullification, or breaches of contracts with customers, vendors, subcontractors or other parties, (viii) consolidation among the Company's competitors or customers, (ix) the partial or complete loss of the revenue the Company generates from IBM, (x) the need to supplement or change our IT services in response to new service offerings in the industry, and (xi) the risks described in Item 1A of this annual report on Form 10-K and from time to time in the Company's reports filed with the Securities and Exchange Commission (SEC).

Industry Trends

The market demand for the Company's services is heavily dependent on IT spending by major corporations, organizations and government entities in the markets and regions that we serve. The pace of technology change and changes in business requirements and practices of our clients all have a significant impact on the demand for the services that we provide. Competition for new engagements and pricing pressure has been strong. Since August 2009, we have noticed an increase in demand for our services, primarily in the healthcare solution and staffing businesses. Our headcount has increased by 100 in each of the last two quarters of 2009. We added seven new electronic medical records (EMR) projects in 2009 ranging from two to three years in duration and have a total of 11 EMR engagements underway as of December 31, 2009. We anticipate a continuation of the relatively strong demand for most of if not all of 2010.

We have two main services, which are providing IT Solutions and IT Staffing to our clients. With IT Solutions, we generally taking responsibility for the deliverables on a project and the services may include high-end consulting services. With IT Staffing, we typically supply personnel to customers who then take their direction from the clients managers. IT solutions and IT staffing revenue as a percentage of total revenue for the years ended December 31, 2009, 2008 and 2007 is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
IT solutions	33%	32%	34%
IT staffing	67%	68%	66%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

The Company promotes a majority of its services through four vertical market focus areas: Technology Service Providers, Healthcare (which includes services provided to healthcare providers, health insurers, and life sciences companies), Energy, and Financial Services. The remainder of CTG's revenue is derived from general markets. CTG's revenue by vertical market for the years ended December 31, 2009, 2008 and 2007 is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Technology service providers	31%	34%	34%
Healthcare	27%	27%	27%
Energy	8%	6%	5%
Financial services	8%	9%	11%
General markets	26%	24%	23%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

The IT services industry is extremely competitive and characterized by continuous changes in customer requirements and improvements in technologies. Our competition varies significantly by geographic region, as well as by the type of service provided. Many of our competitors are larger than CTG, and have greater financial, technical, sales and marketing resources. In addition, the Company frequently competes with a client's own internal IT staff. Our industry is being impacted by the growing use of lower-cost offshore delivery capabilities (primarily India and Asia). There can be no assurance that we will be able to continue to compete successfully with existing or future competitors or that future competition will not have a material adverse effect on our results of operations and financial condition.

Revenue Recognition

The Company recognizes revenue when persuasive evidence of an arrangement exists, when the services have been rendered, when the price is determinable, and when collectibility of the amounts due is reasonably assured. For time-and-material contracts, revenue is recognized as hours are incurred and costs are expended. For contracts with periodic billing schedules, primarily monthly, revenue is recognized as services are rendered to the customer. Revenue for fixed-price contracts is recognized as per the proportional method of accounting using an input-based approach whereby salary and indirect labor costs incurred are measured and compared with the total estimate of costs of such items at completion for a project. Revenue is recognized based upon the percentage-of-completion calculation of total incurred costs to total estimated costs. The Company infrequently works on fixed-price projects that include significant amounts of material or other non-labor related costs which could distort the percent completed within a percentage-of-completion calculation. The Company's estimate of the total labor costs it expects to incur over the term of the contract is based on the nature of the project and our past experience on similar projects, and includes management judgments and estimates which affect the amount of revenue recognized on fixed-price contracts in any accounting period.

The Company's revenue from contracts accounted for under time-and-material, progress billing, and percentage-of-completion methods for the years ended December 31, 2009, 2008 and 2007 is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Time-and-material	91%	90%	88%
Progress billing	7%	7%	8%
Percentage-of-completion	2%	3%	4%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

Results of Operations

The table below sets forth data with the percentage information calculated as a percentage of consolidated revenue as reported on the Company's consolidated statements of income as included in Item 8, "Financial Statements and Supplementary Data" in this report.

Year ended December 31,	2009	2008	2007
(percentage of revenue)			
Revenue	100.0%	100.0%	100.0%
Direct costs	77.5%	77.7%	77.7%
Selling, general, and administrative expenses	18.9%	18.6%	20.3%
Operating income	3.6%	3.7%	2.0%
Interest and other income (expense), net	(0.1)%	0.1%	0.1%
Income before income taxes	3.5%	3.8%	2.1%
Provision for income taxes	1.4%	1.6%	0.8%
Net income	<u>2.1%</u>	<u>2.2%</u>	<u>1.3%</u>

2009 as compared with 2008

In 2009, the Company recorded revenue of \$275.6 million, a decrease of 22.0% as compared with revenue of \$353.2 million recorded in 2008. Revenue from the Company's North American operations totaled \$212.8 million in 2009, a decrease of 22.6% when compared with revenue of \$275.0 million in 2008. Revenue from the Company's European operations totaled \$62.8 million in 2009, a decrease of 19.8% when compared with 2008 revenue from European operations of \$78.2 million. The European revenue represented 22.8% and 22.1% of 2009 and 2008 consolidated revenue, respectively. The Company's revenue includes reimbursable expenses billed to customers. These expenses totaled \$6.1 million and \$8.6 million in 2009 and 2008, respectively.

In North America, the significant revenue decrease in 2009 as compared with 2008 is due to the general weakness in IT spending associated with the current global recession. IT staffing revenue decreased 23.0% and IT solutions revenue decreased 20.0% in 2009 as compared with 2008. The IT solutions revenue decrease totaled \$22.9 million and was primarily due to healthcare providers not having access to capital markets in the current economy which has limited their ability to finance new projects. Additionally, due to the poor economic conditions, customers reduced their discretionary spending on outside professional services.

During the 2008 fourth quarter, the Company was informed by a significant customer of a reduction in their need for approximately 250 of CTG's staff, or approximately \$21 million of annual revenue. Ultimately, this customer reduced its need for the Company's personnel by an aggregate of 425 billable staff or approximately \$36 million in annualized revenue, beginning in the 2008 fourth quarter. The reduction was not a result of CTG's performance, but rather a change in our client's business needs. These reductions coupled with a continued general weakness in 2009 in demand for our IT staffing services from our other customers resulted in our IT staffing business realizing approximately \$54.7 million less revenue in 2009 as compared with 2008.

The decrease in year-over-year revenue in the Company's European operations was primarily due to weakness in their IT staffing business. Additionally, revenue decreased due to the weakness of the currencies of Belgium, the United Kingdom, Luxembourg and Germany, the countries in which the Company's European subsidiaries operate. In Belgium, Luxembourg and Germany, the functional currency is the Euro, while in the United Kingdom the functional currency is the British Pound. In 2009 as compared with 2008, the average value of the Euro decreased 5.2%, while the average value of the

British Pound decreased 15.6%. Had there been no change in these exchange rates from 2008 to 2009, total European revenue would have been approximately \$4.4 million higher, or \$67.2 million as compared with the \$62.8 million reported.

IBM is CTG's largest customer. CTG provides services to various IBM divisions in many locations. During the second quarter of 2008, the Company and IBM agreed to extend the current National Technical Services ("NTS Agreement") contract until July 1, 2011. As part of the NTS Agreement, the Company also provides its services as a predominant supplier to IBM's Integrated Technology Services unit and as the sole provider to the Systems and Technology Group business unit. These agreements accounted for approximately 95% of all of the services provided to IBM by the Company in 2009. In 2009, 2008, and 2007, IBM accounted for \$71.2 million or 25.8%, \$108.3 million or 30.6%, and \$96.0 million or 29.5% of the Company's consolidated revenue, respectively. We expect to continue to derive a significant portion of our revenue from IBM in future years. However, a significant decline or the loss of the revenue from IBM would have a significant negative effect on our operating results. The Company's accounts receivable from IBM at December 31, 2009 totaled \$9.7 million. No other customer accounted for more than 10% of the Company's revenue in 2009, 2008 or 2007.

Direct costs, defined as costs for billable staff including billable out-of-pocket expenses, were 77.5% of consolidated revenue in 2009 and 77.7% of consolidated revenue in 2008. The decrease in direct costs as a percentage of revenue in 2009 compared to 2008 is due to an increase in the Company's IT solutions business in 2009, which in aggregate has lower direct costs and higher direct margins than the Company's IT staffing business. In 2009, the Company's IT solutions business represented 33% of total consolidated revenue, which was an increase of 1% year-over-year.

Selling, general and administrative (SG&A) expenses were 18.9% of revenue in 2009 as compared with 18.6% of revenue in 2008. While the company has closely managed and reduced its SG&A expense as total revenues have decreased, SG&A expense as a percentage of revenue has increased year-over-year as the Company incurs certain fixed costs which cannot be rapidly reduced.

Operating income was 3.6% of revenue in 2009 as compared with 3.7% of revenue in 2008. The decrease in 2009 operating income as a percentage of revenue is due to the significant decrease in revenue year-over-year, offset by disciplined cost control. Operating income from North American operations was \$8.4 million and \$11.1 million in 2009 and 2008, respectively, while European operations generated operating income of \$1.5 million and \$2.0 million in 2009 and 2008, respectively. Operating income was not significantly affected by the change in foreign currency exchange rates year-over-year.

Interest and other income (expense), net was (0.1) % of revenue in 2009 and 0.1% in 2008. In 2009, the Company recorded expense of approximately \$0.2 million to settle intercompany account balances between its subsidiaries with different functional currencies, while in 2008 the Company recorded gains totaling approximately \$0.5 million for the settlement of intercompany account balances, and for those balances outstanding between its subsidiaries with different functional currencies at December 31, 2008.

The Company's effective tax rate (ETR) is calculated based upon the full years' operating results, and various tax related items. The Company's normal ETR is approximately 38% to 42%. The 2009 ETR was 38.7%. The 2009 ETR was affected by an addition to the valuation allowance for net operating losses in foreign countries of approximately \$0.2 million, offset by federal income tax credits of approximately \$0.2 million. The 2008 ETR was 41.2%. The 2008 ETR was affected by an addition to the valuation allowance for net operating losses in foreign countries of approximately \$0.4 million, offset by a reduction in the Company's tax reserves of approximately \$0.1 million and federal income tax credits of approximately \$0.1 million.

Net income for 2009 was 2.1% of revenue or \$0.38 per diluted share, compared with net income of 2.2% of revenue or \$0.49 per diluted share in 2008. Diluted earnings per share were calculated using 15.5 million weighted-average equivalent shares outstanding in 2009 and 15.9 million 2008. The dilutive effect of incremental shares outstanding under the Company's equity-based compensation plans in 2009 was offset by purchases of shares for treasury by the Company during 2009.

2008 as compared with 2007

In 2008, the Company recorded revenue of \$353.2 million, an increase of 8.6% as compared with revenue of \$325.3 million recorded in 2007. Revenue from the Company's North American operations totaled \$275.0 million in 2008, an increase of 8.6% when compared with revenue of \$253.2 million in 2007. Revenue from the Company's European operations totaled \$78.2 million in 2008, an increase of 8.5% when compared with 2007 revenue from European operations of \$72.1 million. The European revenue represented 22.1% and 22.2% of 2008 and 2007 consolidated revenue, respectively. The Company's revenue includes reimbursable expenses billed to customers. These expenses totaled \$8.6 million and \$7.9 million in 2008 and 2007, respectively.

During October 2008, the Company was informed by a significant customer of a reduction in their need for approximately 250 of CTG's staff, or approximately \$21 million in annual revenue. The reduction began in the 2008 fourth quarter and reduced staffing revenue in 2008 by approximately \$4 million. The reduction was not a result of CTG's performance, but rather a change in our customer's business needs.

In North America, the revenue increase in 2008 as compared with 2007 is primarily the result of an increase in both the Company's solutions and staffing businesses. The Company's North American solutions business grew by 16.8% in 2008 as compared with 2007, driven by business wins resulting from investments the Company has made primarily in its healthcare business. These investments were primarily in new offerings, sales territories and additional sales staff. North American staffing revenue increased 4.4% in 2008 as compared with 2007, primarily driven by strong demand in the technology services market for the first half of 2008.

The increase in year-over-year revenue in Europe was primarily due to the strength of the currencies of Belgium, the United Kingdom, Luxembourg, and Germany, the countries in which the Company's European subsidiaries operate. In Belgium, Luxembourg and Germany, the functional currency is the Euro, while in the United Kingdom the functional currency is the British Pound. In 2008 as compared with 2007, the average value of the Euro increased 7.3%, while the average value of the British Pound decreased 7.3%. Had there been no change in these exchange rates from 2007 to 2008, total European revenue would have been approximately \$4.3 million lower in 2008, or \$73.9 million as compared with the \$78.2 million reported.

IBM is CTG's largest customer. CTG provides services to various IBM divisions in many locations. During the second quarter of 2008, the Company and IBM agreed to extend the current National Technical Services ("NTS Agreement") contract until July 1, 2011. As part of the NTS Agreement, the Company also provides its services as a predominant supplier to IBM's Integrated Technology Services and Systems and Technology Group business units. These agreements accounted for approximately 96% of all of the services provided to IBM by the Company in 2008. In 2008 and 2007, IBM accounted for \$108.3 million or 30.6% and \$96.0 million or 29.5% of the Company's consolidated revenue, respectively. The Company continued to derive a significant portion of our revenue from IBM in 2009. However, a significant decline or the loss of the revenue from IBM would have a significant negative effect on our operating results. The Company's accounts receivable from IBM at December 31, 2008 totaled \$8.5 million. No other customer accounted for more than 10% of the Company's revenue in 2008 or 2007.

Direct costs, defined as costs for billable staff including billable out-of-pocket expenses, were 77.7% of both 2008 and 2007 consolidated revenue. The Company's solution business increased 8.4% during 2008 as compared with 2007, while the staffing business increased 8.7% during that time period. Direct costs as a percentage of revenue did not change year-over-year primarily due to the increase in the solutions business which yields higher margins and offset the increase in the Company's staffing business which yields lower margins.

SG&A expenses were 18.6% of revenue in 2008 as compared with 20.3% of revenue in 2007. Overall, the decrease in SG&A expense as a percentage of revenue reflects the Company's continued efforts to control and reduce its SG&A costs throughout the Company as a percentage of revenue. Additionally, during the second and third quarters of 2007, the Company received two unsolicited merger proposals from RCM Technologies, Inc. After consideration of the proposals, the Company's Board of Directors unanimously determined that the proposals were inadequate and did not reflect the value inherent in CTG's business and the Company's potential growth opportunities. In 2008 and 2007, the Company recorded \$0.2 million and \$0.7 million, respectively, included in SG&A expenses related to advisory fees incurred in conjunction with its consideration of the two unsolicited merger proposals.

Operating income was 3.7% of revenue in 2008 as compared with 2.0% of revenue in 2007. The Company's operating income as a percentage of revenue generally increased throughout 2008 primarily due to the higher operating margins associated with the Company's new solution offerings and the reduction in SG&A costs. Additionally, operating income in 2007 was reduced due to the advisory fees described above. Operating income from North American operations was \$11.1 million in 2008 as compared with \$4.6 million in 2007, while European operations recorded operating income of \$2.0 million in 2008 and \$1.9 million in 2007. European operating income was comparable year-over-year as the \$0.1 million increase from 2007 to 2008 was primarily due to the increase in the exchange rates in Belgium, Luxembourg and Germany offset by the decrease in the exchange rate in the United Kingdom.

Interest and other income, net was 0.1% of revenue in both 2008 and 2007. During 2008, the Company recorded a net exchange gain on intercompany balances totaling approximately \$0.5 million on balances settled during 2008 and those balances outstanding between its subsidiaries at December 31, 2008. Additionally, there was less interest expense as a percentage of revenue as compared with 2007 as outstanding borrowings under the revolving credit agreement were generally less in 2008, and interest rates fell throughout 2008. During 2008, the average outstanding debt balance was \$3.8 million as compared with \$5.0 million in 2007. Additionally, during the 2007 first quarter, the Company sold an investment resulting in a gain of approximately \$0.6 million.

The Company's ETR is calculated based upon the full years' operating results, and various tax related items. The Company's normal ETR is approximately 38 to 42%. The 2008 ETR was 41.2%. The 2008 ETR was affected by an addition to the valuation allowance for net operating losses in foreign countries of approximately \$0.4 million, offset by a reduction in the Company's tax reserves of approximately \$0.1 million and federal income tax credits of approximately \$0.1 million. The 2007 ETR was 37.6%, as the Company decreased the valuation allowance for the net operating loss for U.S. state jurisdictions by approximately \$0.2 million, which was offset by adding approximately \$0.1 million to its tax reserves due to changes in estimate of recoverability.

Net income for 2008 was 2.2% of revenue or \$0.49 per diluted share, compared with net income of 1.3% of revenue or \$0.25 per diluted share in 2007. Diluted earnings per share were calculated using 15.9 million weighted-average equivalent shares outstanding in 2008 and 16.7 million 2007. The dilutive effect of incremental shares outstanding under the Company's equity-based compensation plans in 2008 was wholly offset by purchases of shares for treasury by the Company during 2008.

Critical Accounting Policies

The preparation of financial statements and related disclosures in conformity with U.S. generally accepted accounting principles requires the Company's management to make estimates, judgments and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. The Company's significant accounting policies are included in note 1 to the consolidated financial statements contained in this annual report on Form 10-K under Item 8, "Financial Statements and Supplementary Data." These policies, along with the underlying assumptions and judgments made by the Company's management in their application, have a significant impact on the Company's consolidated financial statements. The Company identifies its most critical accounting policies as those that are the most pervasive and important to the portrayal of the Company's financial position and results of operations, and that require the most difficult, subjective and/or complex judgments by management regarding estimates about matters that are inherently uncertain. The Company's most critical accounting policies are those related to goodwill valuation and income taxes, specifically relating to deferred taxes and valuation allowances.

Goodwill Valuation

The Company has goodwill on its books which originated from the purchase in 1999 of a healthcare information technology provider. The goodwill balance of \$35.7 million is evaluated annually as of the Company's October fiscal month-end, or more frequently if facts and circumstances indicate impairment may exist. This evaluation, as applicable, is based on estimates and assumptions that may be used to analyze the appraised value of similar transactions from which the goodwill arose, the appraised value of similar companies, or estimates of future discounted cash flows. The estimates and assumptions on which the Company's evaluations are based involve judgments and are based on currently available information, any of which could prove wrong or inaccurate when made, or become wrong or inaccurate as a result of subsequent events.

At the respective measurement dates for 2009, 2008, and 2007, with the assistance of an independent appraisal company, the Company completed its annual valuation of the business to which the Company's goodwill relates. The valuations indicated that the estimated fair value of the business was substantially in excess of the carrying value of the business in each period, with the estimated fair value of the unit exceeding the carrying value by at least 18% in each period presented. Additionally, there are no other facts or circumstances that arose during 2009, 2008 or 2007 that led management to believe the goodwill balance was impaired.

Income Taxes—Deferred Taxes and Valuation Allowances

At December 31, 2009, the Company had a total of approximately \$6.8 million of current and non-current deferred tax assets, net of deferred tax liabilities recorded on its consolidated balance sheet. The changes in deferred tax assets and liabilities from period to period are determined based upon the changes in differences between the basis of assets and liabilities for financial reporting purposes and the basis of assets and liabilities for tax purposes, as measured by the enacted tax rates when these differences are estimated to reverse. The Company has made certain assumptions regarding the timing of the reversal of these assets and liabilities, and whether taxable income in future periods will be sufficient to recognize all or a part of any gross deferred tax asset of the Company.

At December 31, 2009, the Company had deferred tax assets recorded resulting from net operating losses totaling approximately \$2.8 million. The Company has analyzed each jurisdiction's tax position, including forecasting potential taxable income in future periods and the expiration of the net operating loss carryforwards as applicable, and determined that it is unclear

whether all of these deferred tax assets will be realized at any point in the future. Accordingly, at December 31, 2009, the Company had offset a portion of these assets with a valuation allowance totaling \$2.6 million, resulting in a net deferred tax asset from net operating loss carryforwards of approximately \$0.2 million.

The Company's deferred tax assets and their potential realizability are evaluated each quarter to determine if any changes should be made to the valuation allowance. Any change in the valuation allowance in the future could result in a change in the Company's effective tax rate (ETR). An additional 1% increase in the ETR in 2009 would have reduced net income by approximately \$100,000.

Other Estimates

The Company has also made a number of estimates and assumptions relating to the reporting of its assets and liabilities and the disclosure of contingent assets and liabilities to prepare the consolidated financial statements pursuant to the rules and regulations of the SEC. Such estimates primarily relate to the valuation of stock options for recording equity-based compensation expense, allowances for doubtful accounts receivable, investment valuation, legal matters, and estimates of progress toward completion and direct profit or loss on contracts, as applicable. As future events and their affects can not be determined with precision, actual results could differ from these estimates. Changes in the economic climates in which the Company operates may affect these estimates and will be reflected in the Company's financial statements in the event they occur.

Financial Condition and Liquidity

Cash provided by operating activities was \$3.9 million, \$16.6 million and \$5.3 million in 2009, 2008 and 2007, respectively. In 2009, net income was \$5.9 million while other non-cash adjustments, primarily consisting of depreciation expense, equity-based compensation, deferred income taxes, and deferred compensation totaled \$1.8 million. In the 2008 and 2007 periods, net income was \$7.8 million and \$4.2 million, respectively, while the corresponding non-cash adjustments netted to \$3.8 million and \$4.4 million, respectively. Accounts receivable balances decreased \$3.8 million in 2009 as compared with 2008, \$1.9 million in 2008 as compared with 2007, and \$2.2 million in 2007 as compared with 2006. The decline in the accounts receivable balance in 2009 resulted from a decrease in revenue in the 2009 fourth quarter of approximately 19% when compared with the 2008 fourth quarter, offset by an increase in days sales outstanding (DSO) of three days to 60 days at December 31, 2009. The decreases in the accounts receivable balances in 2008 and 2007 were primarily due to improvements in the timing of the collection of outstanding invoices which resulted in decreases in DSO of one day to 57 days at December 31, 2008, and a decrease of five days to 58 days at December 31, 2007 from 63 days at December 31, 2006. The increase in DSO at December 31, 2009 is due to normal changes in the timing of the receipt of customer payments near year-end.

Other assets increased approximately \$1.2 million, \$0.2 million and \$1.3 million in 2009, 2008 and 2007, respectively, primarily due to the increase in the cash surrender value of certain insurance policies the Company owns, net of borrowings on such policies, if any. Accounts payable decreased \$1.5 million in 2009 and \$0.8 million in 2008 as compared to an increase of \$1.0 million in 2007. The decrease in accounts payable in 2009 is primarily due to the decrease in overall size of the company in 2009 as compared with 2008, while the changes in 2008 and 2007 are primarily due to the timing of certain payments near year-end. Accrued compensation decreased \$4.7 million in 2009 primarily due to lower headcount in 2009 as compared to 2008, as well as lower year-end incentive payments in 2009. Accrued compensation increased \$3.8 million in 2008 primarily due to timing of the last pay date of the U.S. biweekly payroll in relation to year-end, whereas, accrued compensation decreased \$2.7 million in 2007 due to the timing of payments to subcontractors near year-end 2007. Other current

liabilities decreased \$0.9 million in 2009 primarily due to a decrease of \$0.7 million due for value-added tax remittances in our European operations as compared with 2008.

Investing activities used \$3.1 million, \$3.3 million and \$1.3 million in 2009, 2008 and 2007, respectively, primarily due to additions to property, equipment and capitalized software of \$3.1 million in 2009, \$3.1 million in 2008 and \$2.1 million in 2007. In 2007, additions to property, equipment and capitalized software were additionally offset by \$0.8 million received from the sale of certain investments and \$0.2 million received from an insurance claim. The Company has no significant commitments for the purchase of property or equipment at December 31, 2009, and does not expect the amount to be spent in 2010 on additions to property, equipment and capitalized software to significantly vary from the amounts spent in 2008 and 2009.

Financing activities used \$2.1 million, \$5.3 million and \$4.9 million of cash in 2009, 2008 and 2007, respectively. During 2009, 2008 and 2007, the Company used \$4.0 million, \$5.7 million and \$4.4 million, respectively, to purchase approximately 0.7 million, 1.1 million and 0.9 million shares of its stock for treasury. Approximately 0.5 million, 0.3 million and 0.4 million shares remain authorized for future purchases under the Company's share repurchase plan at December 31, 2009, 2008 and 2007, respectively. During both February 2008 and 2009, the Company's Board of Director's authorized 1.0 million additional shares (2.0 million shares total) for future stock repurchases under this program. At December 31, 2009, 2008, and 2007, the Company also experienced changes in its cash account overdrafts, which are primarily due to timing of cash payments versus cash receipts, of \$0.9 million, \$(0.7) million, and \$(1.1) million, respectively.

The Company did not have any borrowings outstanding under its revolving credit line at December 31, 2009, 2008 or 2007. The term of the revolving credit line extends to April 2011, and totals \$35.0 million which can be used for borrowings or letter of credit commitments (LOC's). LOC's at December 31, 2009, 2008, and 2007 totaled \$0.5 million, \$0.5 million, and \$0.4 million, respectively. The Company borrows or repays the revolving credit line as needed based upon its working capital obligations, including the timing of the U.S. bi-weekly payroll. The average outstanding balances under the Company's revolving credit line for 2009, 2008 and 2007 were approximately \$0.5 million, \$3.8 million and \$5.0 million, respectively.

The Company is required to meet certain financial covenants in order to maintain borrowings under its revolving credit line, pay dividends, and make acquisitions. The covenants are measured quarterly, and at December 31, 2009 include a leverage ratio which must be no more than 3.25 to 1, a calculation of minimum tangible net worth which must be no less than \$31.9 million, and total expenditures for property, equipment and capitalized software can not exceed \$5.0 million annually. The Company was in compliance with these covenants at December 31, 2009 as its leverage ratio was 0.0, its minimum tangible net worth was \$36.5 million, and 2009 expenditures for property, equipment and capitalized software were \$3.1 million. The Company was also in compliance with its required covenants at December 31, 2008 and December 31, 2007. When considering current market conditions and the Company's current operating results, the Company believes it will be able to meet its covenants, as applicable, in 2010 and future years.

The Company believes existing internally available funds, cash potentially generated from operations, and available borrowings under the Company's revolving line of credit totaling approximately \$34.5 million at December 31, 2009, will be sufficient to meet foreseeable working capital, capital expenditure, and stock repurchases, and to allow for future internal growth and expansion.

Off-Balance Sheet Arrangements

The Company did not have off-balance sheet arrangements or transactions in either 2009, 2008 or 2007.

Quantitative and Qualitative Disclosures about Market Risk

The Company's primary market risk exposures consist of interest rate risk associated with variable rate borrowings and foreign currency exchange risk associated with the Company's European operations. See Item 7A, "Quantitative and Qualitative Disclosure about Market Risk" in this report.

Contractual Obligations

The Company intends to satisfy its contractual obligations from operating cash flows, and, if necessary, from draws on its revolving credit line. A summary of the Company's contractual obligations at December 31, 2009 is as follows:

(in millions)		Total	Less than 1 year	Years 2-3	Years 4-5	More than 5 years
Long-term debt	A	\$ —	\$ —	\$ —	\$ —	\$ —
Capital lease obligations	B	—	—	—	—	—
Operating lease obligations	C	15.6	5.4	6.1	1.7	2.4
Purchase obligations	D	1.5	1.0	0.5	—	—
Deferred compensation benefits (U.S.)	E	8.8	0.8	1.5	1.5	5.0
Deferred compensation benefits (Europe)	F	—	—	—	—	—
Other long-term liabilities	G	0.4	0.0	0.1	0.1	0.2
Total		<u>\$26.3</u>	<u>\$ 7.2</u>	<u>\$ 8.2</u>	<u>\$ 3.3</u>	<u>\$ 7.6</u>

- A In February 2008, the Company entered into an amendment to its revolving credit agreement (Credit Agreement) which allows the Company to borrow up to \$35 million. This Credit Agreement has a term of three years and expires in April 2011. The Company uses this facility to fund its working capital obligations as needed, primarily funding the U.S. bi-weekly payroll. The Company currently has three outstanding letters of credit totaling approximately \$0.5 million that collateralize an office lease and employee benefit programs.
- B The Company does not have any capital lease obligations outstanding at December 31, 2009.
- C Operating lease obligations relate to the rental of office space, office equipment, and automobiles leased in the Company's European operations. Total rental expense under operating leases in 2009, 2008, and 2007 was approximately \$7.1 million, \$8.1 million, and \$7.4 million, respectively.
- D The Company's purchase obligations in 2010 and 2011 total approximately \$1.5 million, including \$0.4 million for software maintenance, support and related fees, \$0.3 million for computer-based training courses, \$0.1 million for professional organization memberships, \$0.1 million for recruiting services, \$0.1 million for equipment, and \$0.5 million for telecommunications.
- E The Company is committed for deferred compensation benefits in the U.S. under two plans. The Executive Supplemental Benefit Plan (ESBP) provides certain former key executives with deferred compensation benefits. The ESBP was amended as of November 30, 1994 to freeze benefits for participants at that time. Currently, 16 individuals are receiving benefits under this plan. The ESBP is deemed to be unfunded as the Company has not specifically identified Company assets to be used to discharge the deferred compensation benefit liabilities.

The Company also has a non-qualified defined-contribution deferred compensation plan for certain key executives. Contributions to this plan in 2009 were \$0.3 million. The Company anticipates making contributions totaling approximately \$0.1 million in 2010 to this plan for amounts earned in 2009.

- F The Company retained a contributory defined-benefit plan for its previous employees located in The Netherlands when the Company disposed of its subsidiary, CTG Nederland B.V. This plan was curtailed on January 1, 2003 for additional contributions. As this plan is fully funded at December 31, 2009, the Company does not anticipate making additional payments to fund the plan in future years.
- G The Company has other long-term liabilities including payments for a postretirement benefit plan for nine retired employees and their spouses, totaling 13 participants.

Item 7A. Quantitative and Qualitative Disclosure about Market Risk

The Company's primary market risk exposures consist of interest rate risk associated with variable rate borrowings and foreign currency exchange risk associated with the Company's European operations.

In February 2008, the Company entered into an amendment of its credit agreement which extended the expiration date of the agreement to April 2011. This credit agreement allows the Company to borrow up to \$35.0 million based upon available collateral. At both December 31, 2009 and 2008, there were no amounts outstanding under the credit agreement. However, at both December 31, 2009 and 2008, there was \$0.5 million outstanding under letters of credit under the credit agreement.

The maximum amounts outstanding under the Company's credit agreements during 2009, 2008, and 2007 were \$6.2 million, \$13.8 million, and \$13.7 million, respectively. Average bank borrowings outstanding for the years 2009, 2008, and 2007 were \$0.5 million, \$3.8 million, and \$5.0 million, respectively, and carried weighted-average interest rates of 2.2%, 5.0%, and 7.0%, respectively. Accordingly, during 2009, a one percent increase in the weighted-average interest rate would have cost the Company an additional \$5,000. The Company incurred commitment fees totaling approximately \$0.1 million in each of 2009, 2008 and 2007 relative to the agreements.

During 2009, revenue was affected by the year-over-year foreign currency exchange rate changes of Belgium, the United Kingdom, Luxembourg and Germany, which are the countries in which the Company's European subsidiaries operate. In Belgium, Luxembourg and Germany, the functional currency is the Euro, while in the United Kingdom, the functional currency is the British Pound. Had there been no change in these exchange rates from 2008 to 2009, total European revenue would have been approximately \$4.4 million higher in 2009, or \$67.2 million as compared with the \$62.8 million reported. Operating income in Europe was not significantly affected by the change in these exchange rates.

The Company recorded a net exchange gain (loss) on intercompany balances totaling approximately \$(0.2) million and \$0.5 million on balances settled during the year and those balances outstanding between its subsidiaries with different functional currencies at December 31, 2009 and 2008, respectively. The Company has historically not used any market risk sensitive instruments to hedge its foreign currency exchange risk. The Company believes the market risk related to intercompany balances in future periods will not have a material affect on its results of operations.

Item 8. Financial Statements and Supplementary Data

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Computer Task Group, Incorporated:

We have audited the accompanying consolidated balance sheets of Computer Task Group, Incorporated and subsidiaries as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2009. These consolidated financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these consolidated financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the consolidated financial statements referred to above present fairly, in all material respects, the financial position of Computer Task Group, Incorporated and subsidiaries as of December 31, 2009 and 2008, and the results of their operations and their cash flows for each of the years in the three-year period ended December 31, 2009, in conformity with U.S. generally accepted accounting principles.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), Computer Task Group, Incorporated's internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO), and our report dated February 25, 2010 expressed an unqualified opinion on the effectiveness of the Company's internal control over financial reporting.

The accompanying notes are an integral part of these consolidated financial statements.

Notes to Consolidated Financial Statements

1. Summary of Significant Accounting Policies

Basis of Presentation and Consolidation

The consolidated financial statements include the accounts of Computer Task Group, Incorporated, and its subsidiaries (the Company or CTG), located primarily in North America and Europe. There are no unconsolidated entities, or off-balance sheet arrangements. All inter-company accounts and transactions have been eliminated. When necessary, amounts in the prior period's consolidated financial statements are reclassified to conform to the current year presentation. Management of the Company has made a number of estimates and assumptions relating to the reporting of assets and liabilities and the disclosure of contingent assets and liabilities to prepare these consolidated financial statements in conformity with U.S. generally accepted accounting principles. Such estimates primarily relate to the valuation of goodwill, valuation allowances for deferred tax assets, actuarial assumptions including discount rates and expected rates of return, as applicable, for the Company's defined benefit and postretirement benefit plans, the allowance for doubtful accounts receivable, assumptions underlying stock option valuation, investment valuation, legal matters, other contingencies and estimates of progress toward completion and direct profit or loss on contracts. The current economic environment has increased the degree of uncertainty inherent in these estimates and assumptions. Actual results could differ from those estimates.

The Company operates in one industry segment, providing IT services to its clients. These services include IT Solutions and IT Staffing. CTG provides these primary services to all of the markets that it serves. The services provided typically encompass the IT business solution life cycle, including phases for planning, developing, implementing, managing, and ultimately maintaining the IT solution. A typical customer is an organization with large, complex information and data processing requirements. The Company promotes a significant portion of its services through four vertical market focus areas: Technology Service Providers, Healthcare (which includes services provided to healthcare providers, health insurers, and life sciences companies), Energy, and Financial Services. The Company focuses on these four vertical areas as it believes that these areas are either higher growth markets than the general IT services market and the general economy, or are areas that provide greater potential for the Company's growth due to the size of the vertical market. The remainder of CTG's revenue is derived from general markets.

CTG's revenue by vertical market for the years ended December 31, 2009, 2008 and 2007 is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Technology service providers	31%	34%	34%
Healthcare	27%	27%	27%
Energy	8%	6%	5%
Financial services	8%	9%	11%
General markets	<u>26%</u>	<u>24%</u>	<u>23%</u>
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

Revenue and Cost Recognition

The Company recognizes revenue when persuasive evidence of an arrangement exists, when the services have been rendered, when the price is determinable, and when collectibility of the amounts due is reasonably assured. For time-and-material contracts, revenue is recognized as hours are incurred and costs are expended. For contracts with periodic billing schedules, primarily monthly, revenue is recognized as services are rendered to the customer. Revenue for fixed price contracts is

recognized as per the proportional method of accounting using an input-based approach whereby salary and indirect labor costs incurred are measured and compared with the total estimate of costs of such items at completion for a project. Revenue is recognized based upon the percentage-of-completion calculation of total incurred costs to total estimated costs. The Company infrequently works on fixed-price projects that include significant amounts of material or other non-labor related costs which could distort the percent complete within a percentage-of-completion calculation. The Company's estimate of the total labor costs it expects to incur over the term of the contract is based on the nature of the project and our past experience on similar projects, and includes management judgments and estimates which affect the amount of revenue recognized on fixed-price contracts in any accounting period.

The Company's revenue from contracts accounted for under time-and-material, progress billing, and percentage-of-completion methods for the years ended December 31, 2009, 2008 and 2007 is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Time-and-material	91%	90%	88%
Progress billing	7%	7%	8%
Percentage-of-completion	2%	3%	4%
Total	<u>100%</u>	<u>100%</u>	<u>100%</u>

The Company includes billable expenses in its accounts as both revenue and direct costs. These billable expenses totaled \$6.1 million, \$8.6 million, and \$7.9 million in 2009, 2008 and 2007, respectively.

Selling, general, and administrative costs are charged to expense as incurred.

Bad debt expense, net of recoveries was approximately \$0.2 million, \$0.1 million, and \$0.2 million in 2009, 2008 and 2007, respectively.

Fair Value

Fair value is defined as the exchange price that would be received for an asset or paid for a liability in the principal or most advantageous market for the asset or liability, in an orderly transaction between market participants. The Company utilizes a fair value hierarchy for its assets and liabilities, as applicable, based upon three levels of input, which are:

Level 1—quoted prices in active markets for identical assets or liabilities (observable)

Level 2—inputs other than Level 1 that are observable, either directly or indirectly, such as quoted prices for similar assets or liabilities, quoted prices in inactive markets, or other inputs that are observable or can be supported by observable market data for essentially the full term of the asset or liability (observable)

Level 3—unobservable inputs that are supported by little or no market activity, but are significant to determining the fair value of the asset or liability (unobservable)

At December 31, 2009 and 2008, the carrying amounts of the Company's cash and cash equivalents of \$10.4 million and \$11.0 million, respectively, approximated fair value.

As of January 1, 2009, the Company was also allowed to elect an irrevocable option to measure, on a contract by contract basis, specific financial instruments and certain other items that are currently not being measured at fair value. The Company did not elect to apply the fair value provisions of this standard for any specific contracts during the year ended December 31, 2009.

Investments

The Company's investments consist of mutual funds which are allocated to the Computer Task Group, Incorporated Non-qualified Key Employee Deferred Compensation Plan. At both December 31, 2009 and 2008, the Company's investment balances for this plan, which are classified as trading securities, totaled \$0.6 million. These investment balances are measured at fair value, and the fair value was determined using Level 1 (see "Fair Value" in note 1) inputs.

Unrealized gains and losses on these securities are recorded in earnings, and were nominal in 2009, 2008 and 2007. All other investments consisting of equity securities were sold during 2007 for a gain of approximately \$0.6 million.

Property and Equipment and Capitalized Software Costs

Property and equipment are generally stated at historical cost less accumulated depreciation. Depreciation is computed using the straight-line method based on estimated useful lives of one year to 30 years, and begins after an asset has been put into service. The cost of property or equipment sold or otherwise disposed of, along with related accumulated depreciation, is eliminated from the accounts, and the resulting gain or loss, if any, is reflected in current earnings. Maintenance and repairs are charged to expense when incurred, while significant improvements to existing assets are capitalized.

As of December 31, 2009, the Company has capitalized a total of approximately \$3.9 million for six projects either developed for internal use or developed to be sold, leased or otherwise marketed. During 2008, the Company began to amortize two of these six projects as they were complete and placed into service. Amortization expense for these two projects totaled \$0.1 million in both 2009 and 2008.

Leases

The Company is obligated under a number of long-term operating leases primarily for the rental of office space, office equipment and automobiles based in Europe. In instances where the Company has negotiated leases that contain rent holidays or escalation clauses, the expense for those leases is recognized monthly on a straight-line basis over the term of the lease.

Goodwill

The Company has goodwill on its books which originated from the purchase in 1999 of a healthcare information technology provider. The goodwill balance of \$35.7 million is evaluated annually as of the Company's October fiscal month-end, or more frequently if facts and circumstances indicate impairment may exist. This evaluation, as applicable, is based on estimates and assumptions that may be used to analyze the appraised value of similar transactions from which the goodwill arose, the appraised value of similar companies, or estimates of future discounted cash flows. The estimates and assumptions on which the Company's evaluations are based involve judgments and are based on currently available information, any of which could prove wrong or inaccurate when made, or become wrong or inaccurate as a result of subsequent events.

At the respective measurement dates for 2009, 2008, and 2007, with the assistance of an independent appraisal company, the Company completed its annual valuation of the business to which the Company's goodwill relates. The valuations indicated that the estimated fair value of the business was substantially in excess of the carrying value of the business in each period, with the estimated fair value of the unit exceeding the carrying value by at least 18% in each period presented. Additionally, there are no other facts or circumstances that arose during 2009, 2008 or 2007 that led management to believe the goodwill balance was impaired.

Impairment of Long-Lived Assets and Long-Lived Assets to Be Disposed Of

Long-lived assets are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount of an asset may not be recoverable. The recoverability of assets to be held and used is measured by a comparison of the carrying amount of an asset to future cash flows expected to be generated by the asset. If such assets are considered to be impaired, the impairment to be recognized is measured by the amount by which the carrying amount of the assets exceeds the fair value of the assets. Assets to be disposed of by sale are reported at the lower of the carrying amount or fair value less costs to sell. The Company does not have any long-lived assets that are impaired or that it intends to dispose of at December 31, 2009.

Income Taxes

The Company provides for deferred income taxes for the temporary differences between the financial reporting basis and the tax basis of the Company's assets and liabilities. In assessing the realizability of deferred tax assets, management considers within each tax jurisdiction, whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax-planning strategies in making this assessment.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in tax expense.

Equity-Based Compensation

The Company records the fair value of equity-based compensation expense for all equity-based compensation awards granted subsequent to January 1, 2006, and for the unvested portion of previously granted awards outstanding as of that date. The calculated fair value cost of its equity-based compensation awards is recognized in the Company's income statement over the period in which an employee or director is required to provide the services for the award. Compensation cost is not recognized for employees or directors that do not render the requisite services. The Company recognized the expense for equity-based compensation in its 2009, 2008 and 2007 statements of income on a straight-line basis based upon awards that are ultimately expected to vest. See note 9, "Equity-Based Compensation."

Net Income Per Share

Basic and diluted earnings per share (EPS) for the years ended December 31, 2009, 2008, and 2007 are as follows:

For the year ended	Net Income	Weighted Average Shares	Earnings per Share
(amounts in thousands, except per-share data)			
December 31, 2009			
Basic EPS	\$5,933	14,808	\$ 0.40
Dilutive effect of outstanding equity instruments	—	741	(0.02)
Diluted EPS	<u>\$5,933</u>	<u>15,549</u>	<u>\$ 0.38</u>
December 31, 2008			
Basic EPS	\$7,837	15,328	\$ 0.51
Dilutive effect of outstanding equity instruments	—	550	(0.02)
Diluted EPS	<u>\$7,837</u>	<u>15,878</u>	<u>\$ 0.49</u>
December 31, 2007			
Basic EPS	\$4,246	16,181	\$ 0.26
Dilutive effect of outstanding equity instruments	—	473	(0.01)
Diluted EPS	<u>\$4,246</u>	<u>16,654</u>	<u>\$ 0.25</u>

Weighted-average shares represent the average number of issued shares less treasury shares and shares held in the Stock Trusts, and for the basic EPS calculations, unvested restricted stock.

Certain options representing 0.1 million, 2.0 million, and 1.7 million shares of common stock were outstanding at December 31, 2009, 2008, and 2007, respectively, but were not included in the computation of diluted earnings per share as their effect on the computation would have been anti-dilutive.

Foreign Currency

The functional currency of the Company's foreign subsidiaries is the applicable local currency. The translation of the applicable foreign currencies into U.S. dollars is performed for assets and liabilities using current exchange rates in effect at the balance sheet date, for equity accounts using historical exchange rates, and for revenue and expense activity using the applicable month's average exchange rates. The Company recorded gains (losses) totaling approximately \$(0.2) million in 2009, \$0.5 million in 2008 and \$0 in 2007 from foreign currency transactions for balances settled during the year and those balances outstanding between its subsidiaries at year-end.

Cash and Cash Equivalents, and Cash Overdrafts

For purposes of the statement of cash flows, cash and cash equivalents are defined as cash on hand, demand deposits, and short-term, highly liquid investments with a maturity of three months or less. Total cash equivalents at December 31, 2009 and 2008 totaled \$0 and \$7.7 million, respectively and consisted of overnight interest-bearing deposits. Additionally, as the Company does not fund its bank accounts for the checks it has written until the checks are presented to the bank for payment, the change in cash overdraft, net represents the increase or decrease in outstanding checks year-over-year.

Taxes Collected from Customers

In instances where the Company collects taxes from its customers for remittance to governmental authorities, primarily in its European operations, revenue is not recorded as such taxes are recorded and presented on a net basis.

Accumulated Other Comprehensive Loss

The components that make up accumulated other comprehensive loss on the consolidated balance sheets at December 31, 2009, 2008, and 2007 are as follows:

	2009	2008	2007
(amounts in thousands)			
Foreign currency adjustment	\$(3,205)	\$(3,701)	\$(1,780)
Pension loss adjustment, net of tax of \$894 in 2009, \$369 in 2008 and \$458 in 2007	(1,321)	(229)	(404)
	<u>\$(4,526)</u>	<u>\$(3,930)</u>	<u>\$(2,184)</u>

For the years ended December 31, 2009, 2008 and 2007, tax expense (benefit) associated with the pension loss adjustment, net was \$(0.5) million, \$0.1 million and \$0.5 million, respectively.

Postretirement Benefit Obligations Resulting from Insurance Contracts

The Company records a liability for the cost of insurance related to the purchase of endorsement split-dollar life insurance arrangements for employees where the policy remains in place after the employee's retirement. The Company calculated and recorded the present value of the postretirement benefit obligation as an adjustment to retained earnings as of January 1, 2008. This cumulative effect adjustment totaled approximately \$82,000.

2. Property, Equipment and Capitalized Software

Property, equipment and capitalized software at December 31, 2009 and 2008 are summarized as follows:

December 31,	Useful Life	2009	2008
(amounts in thousands)	(years)		
Land	—	\$ 378	\$ 378
Buildings	30	4,542	4,441
Equipment	2-5	9,122	10,328
Furniture	5-10	3,859	4,048
Capitalized software	2-5	3,856	1,654
Other software	1-5	2,851	4,477
Leasehold improvements	3-10	3,133	3,315
		<u>27,741</u>	<u>28,641</u>
Less accumulated depreciation and amortization		<u>(19,595)</u>	<u>(21,874)</u>
		<u>\$ 8,146</u>	<u>\$ 6,767</u>

3. Debt

The Company's revolving credit agreement (Agreement) allows the Company to borrow up to \$35.0 million, has a term of three years, and expires in April 2011. The Agreement has interest rates ranging from 0 to 75 basis points over the prime rate and 150 to 225 basis points over LIBOR, and provides certain of the Company's assets as security for outstanding borrowings. At December 31, 2009 and 2008, there were no amounts outstanding under this Agreement, however, there were \$0.5 million assigned to letters of credit under this Agreement at both December 31, 2009 and 2008.

The maximum amounts outstanding under the Agreement during 2009, 2008, and 2007 were \$6.2 million, \$13.8 million, and \$13.7 million, respectively. Average bank borrowings outstanding for the years 2009, 2008, and 2007 were \$0.5 million, \$3.8 million, and \$5.0 million, respectively, and carried weighted-average interest rates of 2.2%, 5.0%, and 7.0%, respectively. The Company incurred commitment fees totaling approximately \$0.1 million in each of 2009, 2008 and 2007 relative to the Agreement. Interest paid during 2009, 2008, and 2007 totaled \$0 million, \$0.2 million, and \$0.4 million, respectively.

The Company is required to meet certain financial covenants in order to maintain borrowings under the Agreement, pay dividends, and make acquisitions. The covenants are measured quarterly, and at December 31, 2009 include a leverage ratio which must be no more than 3.25 to 1, a calculation of minimum tangible net worth which must be no less than \$31.9 million, and total expenditures for property, equipment and capitalized software can not exceed \$5.0 million annually. The Company was in compliance with these covenants at December 31, 2009 as its leverage ratio was 0.0, its minimum tangible net worth was \$36.5 million, and 2009 expenditures for property, equipment and capitalized software were \$3.1 million. The Company was also in compliance with its required covenants at December 31, 2008 and December 31, 2007.

In our European operations, the Company has a variety of guarantees in place supporting office leases and performance under government projects. These guarantees totaled approximately \$0.5 million at December 31, 2009.

4. Income Taxes

The provision for income taxes for 2009, 2008, and 2007 consists of the following:

	2009	2008	2007
(amounts in thousands)			
Domestic and foreign components of income before income taxes are as follows:			
Domestic	\$8,997	\$11,798	\$6,438
Foreign	679	1,540	371
	<u>\$9,676</u>	<u>\$13,338</u>	<u>\$6,809</u>
The provision (benefit) for income taxes consists of:			
Current tax:			
U.S. federal	\$2,540	\$ 3,344	\$1,753
Foreign	1,024	1,191	792
U.S. state and local	673	670	279
	<u>4,237</u>	<u>5,205</u>	<u>2,824</u>
Deferred tax:			
U.S. federal	(443)	(215)	(132)
Foreign	(98)	357	(8)
U.S. state and local	47	154	(121)
	<u>(494)</u>	<u>296</u>	<u>(261)</u>
	<u>\$3,743</u>	<u>\$ 5,501</u>	<u>\$2,563</u>
The effective and statutory income tax rate can be reconciled as follows:			
Tax at statutory rate of 34%	\$3,290	\$ 4,535	\$2,315
State tax, net of federal benefits	429	560	289
Benefit of state net operating losses previously offset by valuation allowances	—	(27)	(185)
Non-taxable income	(591)	(606)	(783)
Non-deductible expenses	636	919	982
Change in estimate primarily related to foreign taxes	186	407	—
Change in estimate primarily related to state taxes and tax reserves	21	(128)	65
Benefit of foreign net operating losses previously offset by valuation allowances	(9)	(56)	(60)
Tax credits	(143)	(79)	—
Other, net	(76)	(24)	(60)
	<u>\$3,743</u>	<u>\$ 5,501</u>	<u>\$2,563</u>
Effective income tax rate	38.7%	41.2%	37.6%

The Company's effective tax rate (ETR) is calculated based upon the full years' operating results, and various tax related items. The Company's normal ETR is approximately 38% to 42%. The 2009 ETR was 38.7%. The 2009 ETR was affected by an addition to the valuation allowance for net operating losses in foreign countries of approximately \$0.2 million, offset by federal income tax credits of approximately \$0.2 million. The 2008 ETR was 41.2%. The 2008 ETR was affected by an addition to the valuation allowance for net operating losses in foreign countries of approximately \$0.4 million, offset by a net reduction in the Company's tax reserves of approximately \$0.1 million and federal income tax credits of approximately \$0.1 million.

The expected relationship between foreign income before taxes and foreign provision (benefit) for income taxes differs from the actual relationship above as a result of certain foreign losses incurred in the current year for which no tax benefit has been recognized. Management has determined that it is unclear whether operations in those jurisdictions will produce taxable income in future years sufficient to realize the benefit of the current year losses in those jurisdictions. In addition, certain costs deducted for financial statement purposes are not deductible for tax purposes in certain foreign jurisdictions, such as certain employee benefit costs, resulting in a substantial increase to foreign taxable income.

The Company's deferred tax assets and liabilities at December 31, 2009 and 2008 consist of the following:

December 31,	2009	2008
(amounts in thousands)		
Assets		
Deferred compensation	\$ 4,898	\$ 3,895
Loss carryforwards	2,792	2,661
Accruals deductible for tax purposes when paid	580	702
Depreciation	94	98
Allowance for doubtful accounts	263	250
Amortization	322	441
State taxes	662	612
Gross deferred tax assets	9,611	8,659
Deferred tax asset valuation allowance	(2,649)	(2,454)
Gross deferred tax assets less valuation allowance	6,962	6,205
Liabilities		
Accrued income not recognized for tax purposes	(122)	(286)
Other	(14)	(100)
Gross deferred tax liabilities	(136)	(386)
Net deferred tax assets	\$ 6,826	\$ 5,819
Net deferred assets and liabilities are recorded as follows:		
Net current assets	\$ 1,382	\$ 1,538
Net non-current assets	5,566	4,667
Net current liabilities	—	(99)
Net non-current liabilities	(122)	(287)
Net deferred tax assets	\$ 6,826	\$ 5,819

At December 31, 2009 and 2008, as applicable, net current liabilities and net non-current liabilities are recorded on the consolidated balance sheet in other current liabilities and other long-term liabilities, respectively. In assessing the realizability of deferred tax assets, management considers, within each taxing jurisdiction, whether it is more likely than not that some portion or all of the deferred tax assets will not be realized. Management considers the scheduled reversal of deferred tax liabilities, projected future taxable income, and tax planning strategies in making this assessment. Factors that may affect the Company's ability to achieve sufficient forecasted taxable income in future periods may include, but are not limited to, the following: increased competition, a decline in sales or margins, a loss of market share, the availability of qualified professional staff, and a decrease in demand for IT services. Based upon the levels of historical taxable income and projections for future taxable income over the years in which the deferred tax assets are deductible, at December 31, 2009, management believes that it is more likely than not that the Company will realize the benefits, net of the established valuation allowance, of these deferred tax assets in the future.

For tax purposes, the Company has various U.S. state net operating loss carryforwards totaling approximately \$4.9 million. These state net operating losses have a carryforward period of 5 to 20 years and begin to expire in 2010. The Netherlands net operating loss carryforward of \$8.8 million begins to expire in 2011, while in the United Kingdom the net operating loss carryforward is approximately \$1.1 million, and has no expiration date.

At December 31, 2009, the Company has a deferred tax asset before the valuation allowance in the United States resulting from net operating losses in various states of approximately \$0.2 million, in The Netherlands of approximately \$2.2 million and approximately \$0.4 million in various other countries where it does business. Management of the Company has analyzed each jurisdiction's tax position, including forecasting potential taxable income in future years, and the expiration of the net operating loss carryforwards as applicable, and determined that it is unclear whether all of the deferred tax asset totaling \$2.8 million will be realized at any point in the future. Accordingly, at December 31, 2009, the Company has offset a portion of the asset with a valuation allowance totaling \$2.6 million, resulting in a net deferred tax asset from net operating loss carryforwards of approximately \$0.2 million. During 2009, the valuation allowance increased by approximately \$0.2 million net, due to a variety of factors including the expiration of certain loss carryforwards in Canada of approximately \$0.1 million and \$0.3 million related to the establishment of a net operating loss valuation allowance related to current year losses in certain foreign jurisdictions.

The Company files income tax returns in the U.S. federal jurisdiction, and various states and foreign jurisdictions. With few exceptions, the Company is no longer subject to U.S. federal, state and local, or non-U.S. income tax examinations by tax authorities for years prior to 2005.

A reconciliation of unrecognized tax benefits for 2008 and 2009 is as follows:

(amounts in thousands)	
Balance at January 1, 2008	\$ 289
Additions based on tax positions related to the current year	29
Additions for tax positions of prior years	7
Reductions for lapse of statute of limitations	(47)
Settlements	(211)
Balance at December 31, 2008	\$ 67
Additions based on tax positions related to the current year	21
Additions for tax positions of prior years	—
Reductions for lapse of statute of limitations	—
Settlements	(7)
Balance at December 31, 2009	<u>\$ 81</u>

The balance at December 31, 2009 of \$81,000 represents gross unrecognized tax benefits that if recognized would impact the Company's effective tax rate. No significant increase or decrease in the total amount of unrecognized tax benefits is expected within the next twelve months.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits in tax expense. As of January 1, 2007, the Company accrued approximately \$15,000 in interest and penalties, as applicable. At December 31, 2009, the Company had approximately \$4,000 (less the associated tax benefit) accrued for the payment of interest and penalties, as applicable.

The Company has established its unrecognized tax benefits based upon the anticipated outcome of tax positions taken for financial statement purposes compared with positions taken on the Company's tax returns. The Company records the benefit for unrecognized tax benefits only when it is

more likely than not that the position will be sustained upon examination by the taxing authorities. The Company reviews its unrecognized tax benefits on a quarterly basis. Such reviews include consideration of factors such as the cause of the action, the degree of probability of an unfavorable outcome, the Company's ability to estimate the liability, and the timing of the liability and how it will impact the Company's other tax attributes. At December 31, 2009, the Company believes it has adequately provided for its tax-related liabilities.

Undistributed earnings of the Company's foreign subsidiaries were minimal at December 31, 2009, and are considered to be indefinitely reinvested. Accordingly, no provision for U.S. federal and state income taxes has been provided thereon. Upon distribution of these earnings in the form of dividends or otherwise, the Company would be subject to both U.S. income taxes (subject to an adjustment for foreign tax credits) and withholding taxes payable to the various foreign countries. In the event that the foreign entities' earnings were distributed, it is estimated that U.S. federal and state income taxes, net of foreign credits, would be immaterial.

In 2009, 2008, and 2007, 175,000, 140,000, and 131,000 shares of common stock, respectively, were issued through the exercise of non-qualified stock options or through the disqualifying disposition of incentive stock options. The tax benefit to the Company from these transactions, which was credited to capital in excess of par value rather than recognized as a reduction of income tax expense, was \$273,000, \$99,000, and \$45,000 in 2009, 2008, and 2007, respectively. These tax benefits have also been recognized in the consolidated balance sheets as a reduction of income taxes payable.

Net income tax payments during 2009, 2008, and 2007 totaled \$3.5 million, \$4.3 million, and \$1.7 million, respectively.

5. Lease Commitments

At December 31, 2009, the Company was obligated under a number of long-term operating leases, a number of which contain renewal options with escalation clauses commensurate to local market fluctuations, however, generally limiting the increase to no more than 5.0% of the existing lease payment.

Minimum future obligations under such leases are summarized as follows:

Year ending December 31, (amounts in thousands)	
2010	\$ 5,384
2011	3,827
2012	2,330
2013	1,108
2014	584
Later years	<u>2,394</u>
Minimum future obligations	<u>\$15,627</u>

The operating lease obligations relate to the rental of office space, office equipment, and automobiles leased in Europe. Total rental expense under such operating leases for 2009, 2008, and 2007 was approximately \$7.1 million, \$8.1 million, and \$7.4 million, respectively.

6. Deferred Compensation Benefits

The Company maintains a non-qualified defined-benefit Executive Supplemental Benefit Plan (ESBP) that provides certain former key executives with deferred compensation benefits, based on years of service and base compensation, payable during retirement. The plan was amended as of November 30, 1994, to freeze benefits for participants at that time.

Net periodic pension cost for the years ended December 31, 2009, 2008, and 2007 for the ESBP is as follows:

Net Periodic Pension Cost—ESBP	2009	2008	2007
(amounts in thousands)			
Interest cost	\$516	\$510	\$488
Amortization of actuarial loss	87	66	99
Net periodic pension cost	<u>\$603</u>	<u>\$576</u>	<u>\$587</u>

The Company also retained a contributory defined-benefit plan for its previous employees located in The Netherlands (NDBP) when the Company disposed of its subsidiary, CTG Nederland, B.V. Benefits paid are a function of a percentage of career average pay. This plan was curtailed for additional contributions in January 2003.

Net periodic pension cost (benefit) for the periods ended December 31, 2009, September 29, 2008, and September 30, 2007 for the NDBP is as follows:

Net Periodic Pension Cost (Benefit)—NDBP	2009	2008	2007
(amounts in thousands)			
Interest cost	\$ 304	\$ 300	\$ 265
Expected return on plan assets	(310)	(391)	(338)
Amortization of actuarial loss	(9)	(5)	(18)
Net periodic pension benefit	<u>\$ (15)</u>	<u>\$ (96)</u>	<u>\$ (91)</u>

The change in benefit obligation and reconciliation of fair value of plan assets for the years ended December 31, 2009 and 2008 for the ESBP and NDBP are as follows:

Changes in Benefit Obligation	ESBP		NDBP	
	2009	2008	2009	2008
(amounts in thousands)				
Benefit obligation at beginning of period	\$8,132	\$8,147	\$ 5,529	\$ 5,474
Interest cost	516	510	304	300
Benefits paid	(796)	(767)	(86)	(69)
Actuarial (gain) loss	981	242	730	(169)
Effect of exchange-rate changes	—	—	120	(7)
Benefit obligation at end of period	8,833	8,132	6,597	5,529
Reconciliation of Fair Value of Plan Assets				
Fair value of plan assets at beginning of period	—	—	7,886	7,550
Actual return on plan assets	—	—	408	372
Employer contributions	796	767	—	—
Benefits paid	(796)	(767)	(86)	(69)
Effect of exchange-rate changes	—	—	142	33
Fair value of plan assets at end of period	—	—	8,350	7,886
Accrued benefit cost (asset)	<u>\$8,833</u>	<u>\$8,132</u>	<u>\$(1,753)</u>	<u>\$(2,357)</u>
Accrued benefit cost (asset) is included in the consolidated balance sheet as follows:				
Non-current assets	\$ —	\$ —	\$(1,753)	\$(2,357)
Current liabilities	\$ 772	\$ 791	\$ —	\$ —
Non-current liabilities	\$8,061	\$7,341	\$ —	\$ —
Discount rate:				
Benefit obligation	5.34%	6.34%	5.00%	5.60%
Net periodic pension cost	6.34%	6.57%	5.00%	5.60%
Salary increase rate	—	—	—	—
Expected return on plan assets	—	—	4.00%	4.00%

For the ESBP, the accumulated benefit obligation at December 31, 2009 and 2008 was \$8.8 million and \$8.1 million, respectively. The amounts included in other comprehensive loss relating to the pension loss adjustment in 2009 and 2008, net of tax, were approximately \$0.6 million and \$(0.1) million, respectively. The discount rate used in 2009 was 5.34%, which is reflective of a series of bonds that are included in the Moody's Aa long-term corporate bond yield whose cash flow approximates the payments to participants under the ESBP for the remainder of the plan. This rate was a decrease of 100 basis points from the rate used in the prior year and resulted in an increase in the plan's liabilities of approximately \$0.9 million. Benefits paid to participants are funded by the Company as needed, and are expected to total approximately \$0.8 million in 2010. The plan is deemed unfunded as the Company has not specifically identified Company assets to be used to discharge the deferred compensation benefit liabilities. The Company has purchased insurance on the lives of certain plan participants in amounts considered sufficient to reimburse the Company for the costs associated with the plan for those participants. The Company does not anticipate making contributions to the plan other than for current year benefit payments as required in 2010 or future years.

For the NDBP, the accumulated benefit obligation was \$6.6 million and \$5.5 million at December 31, 2009 and December 31, 2008, respectively. The discount rate used in 2009 was 5.0%, which is reflective of a series of corporate bonds whose cash flow approximates the payments to participants under the NDBP for the remainder of the plan. This rate was a decrease of 60 basis points from the rate used in the prior year and resulted in a net increase in the plan's liabilities of approximately \$0.7 million.

The assets for the NDBP are held by Aegon, a financial services firm located in The Netherlands. The assets for the plan are included in a general portfolio of government bonds, a portion of which is allocated to the NDBP based upon the estimated pension liability associated with the plan. The fair market value of the plan's assets approximates the amount allocated to the NDBP in any given year. The fair value of the assets is determined using a Level 3 methodology (see note 1 "Summary of Significant Accounting Policies—Fair Value"). The calculation of fair value includes determining the present value of the future expected payments under the plan, including using assumptions such as expected market rates of return, equity and interest rate volatility, credit risk, correlations of market returns, and discount rates. In 2009 and 2008, the plan investments had a targeted minimum return to the Company of 4%, which is consistent with historical returns and the guaranteed 4% return guaranteed to the participants of the plan. The Company, in conjunction with Aegon, intends to maintain the current investment strategy of investing plan assets solely in government bonds in 2010. The Company does not anticipate making additional contributions to the plan in 2010 or future years, as the plan is currently fully funded.

Anticipated benefit payments for the ESBP and the NDBP expected to be paid in future years are as follows:

Year ending December 31,	ESBP	NDBP
(amounts in thousands)		
2010	\$ 790	\$ 100
2011	778	107
2012	767	119
2013	748	142
2014	767	161
2015-2019	3,636	1,164
	<u>\$7,486</u>	<u>\$1,793</u>

The disclosures below include the ESBP, the NDBP, and the postretirement benefit plan discussed in note 7, "Employee Benefits," under the caption "Other Postretirement Benefits."

The amounts included in accumulated other comprehensive loss, net of tax, that have not yet been recognized as components of net periodic benefit cost as of December 31, 2009 are as follows:

	ESBP	NDBP	Post-Retirement Plan	Total
(amounts in thousands)				
Unrecognized actuarial (gain) loss	\$1,690	\$(359)	\$(64)	\$1,267
Unrecognized transition obligation	—	—	55	55
Unrecognized prior service cost	—	—	(1)	(1)
	<u>\$1,690</u>	<u>\$(359)</u>	<u>\$(10)</u>	<u>\$1,321</u>

The amounts included in accumulated other comprehensive loss, net of tax, that have not yet been recognized as components of net periodic benefit cost as of December 31, 2008 were as follows:

	ESBP	NDBP	Post-Retirement Plan	Total
(amounts in thousands)				
Unrecognized actuarial (gain) loss	\$1,130	\$(858)	\$(115)	\$157
Unrecognized transition obligation	—	—	73	73
Unrecognized prior service cost	—	—	(1)	(1)
	<u>\$1,130</u>	<u>\$(858)</u>	<u>\$ (43)</u>	<u>\$229</u>

The amounts recognized in other comprehensive loss, net of tax, for 2009, 2008, and 2007, which primarily consist of an actuarial (gain) loss and a transition obligation, totaled \$(1,093,000), \$175,000, and \$1,072,000, respectively. Net periodic pension cost (benefit) for the ESBP and the NDBP, net periodic postretirement benefit cost, and the amounts recognized in other comprehensive loss, net of tax, for 2009, 2008, and 2007 totaled \$(466,000), \$724,000, and \$1,640,000, respectively.

The amounts in accumulated other comprehensive loss expected to be recognized as components of net periodic benefit cost during 2010 are as follows:

	<u>ESBP</u>	<u>NDBP</u>	<u>Post-Retirement Plan</u>	<u>Total</u>
(amounts in thousands)				
Unrecognized actuarial (gain) loss	\$166	\$—	\$ (6)	\$160
Unrecognized transition obligation	—	—	29	29
Unrecognized prior service cost	—	—	—	—
	<u>\$166</u>	<u>\$—</u>	<u>\$ 23</u>	<u>\$189</u>

The Company also maintains a non-qualified defined-contribution deferred compensation plan for certain key executives. Company contributions to this plan, if any, are based on annually defined financial performance objectives. There were \$0.3 million in contributions to the plan in 2009 for amounts earned in 2008, \$0.4 million in contributions to the plan in 2008 for amounts earned in 2007, and \$0.4 million in contributions to the plan in 2007 for amounts earned in 2006. The Company anticipates making contributions in 2010 totaling approximately \$0.1 million to this plan for amounts earned in 2009. The investments in the plan are included in the total assets of the Company, and are discussed in note 1, "Summary of Significant Accounting Policies—Investments." During 2009, several participants in the plan exchanged a portion of their investments for stock units which represent shares of the Company's common stock. In exchange for the funds received, the Company issued shares out of treasury stock equivalent to the number of share units received by the participants. These shares of common stock are not entitled to any voting rights and the holders will not receive dividends, if any are paid. The shares are being held by the Company, and will be released to the participants as prescribed by their payment elections under the plan.

7. Employee Benefits

401(k) Profit-Sharing Retirement Plan

The Company maintains a contributory 401(k) profit-sharing retirement plan covering substantially all U.S. employees. At its discretion, the Company may match up to 50% of the first 6% of eligible wages contributed by the participants. During part of 2009, the Company reduced its match from 50% of the first 6% of eligible wages to 50% of the first 4% of eligible wages. Company contributions consist of cash, and may include the Company's stock, were funded and charged to operations in the amounts of \$1.4 million, \$2.5 million, and \$2.3 million for 2009, 2008, and 2007, respectively.

Other Retirement Plans

The Company maintains various other defined contribution retirement plans covering substantially all of the remaining European employees. Company contributions charged to operations were \$0.1 million in 2009 and \$0.2 million in both 2008 and 2007.

The Company provides limited healthcare and life insurance benefits to nine retired employees and their spouses, totaling 13 participants, pursuant to contractual agreements.

Net periodic postretirement benefit cost for the years ended December 31, 2009, 2008, and 2007 is as follows:

Net Periodic Postretirement Benefit Cost	2009	2008	2007
(amounts in thousands)			
Interest cost	\$ 23	\$ 40	\$39
Amortization of transition amount	29	29	29
Amortization of actuarial loss (gain)	(13)	—	4
Net periodic postretirement benefit cost	<u>\$ 39</u>	<u>\$ 69</u>	<u>\$72</u>

No adjustments were made to the 2009, 2008 or 2007 net periodic postretirement benefit cost due to Medicare reform as the amounts were deemed to be insignificant.

The change in postretirement benefit obligation at December 31, 2009 and 2008 is as follows:

Changes in Postretirement Benefit Obligation	2009	2008
(amounts in thousands)		
Postretirement benefit obligation at beginning of year	\$ 379	\$ 655
Interest cost	23	40
Benefits paid	(52)	(75)
Actuarial (gain) / loss	61	(241)
Postretirement benefit obligation at end of year	411	379
Fair value of plan assets at end of year	—	—
Accrued postretirement benefit obligation	<u>\$ 411</u>	<u>\$ 379</u>
Accrued postretirement benefit obligation is included in the consolidated balance sheet as follows:		
Current liabilities	\$ 37	\$ 36
Non-current liabilities	\$ 374	\$ 343
Discount rate:		
Benefit obligation	5.22%	6.34%
Net periodic postretirement benefit cost	6.34%	6.51%
Salary increase rate	—	—

The discount rate used in 2009 to calculate the benefit obligation was 5.22%, which is reflective of a series of bonds that are included in the Moody's Aa long-term corporate bond yield whose cash flow approximates the payments to participants for the remainder of the plan. For December 31, 2009, the Company updated its methodology for determining the average cost of benefits provided to retirees from prior years which caused a decrease in accrued post retirement benefit obligation from 2008 to 2009. Benefits paid to participants are funded by the Company as needed.

Anticipated benefit payments for the postretirement medical plan are expected to be paid in future years as follows:

Year ending December 31,	
(amounts in thousands)	
2010	\$ 38
2011	39
2012	38
2013	38
2014	38
2015-2019	159
	<u>\$350</u>

The rate of increase in healthcare costs is assumed to be 8.5% for medical, 5.5% for dental, and 5.0% for Medicare Part B in 2010, gradually declining to 6.0% for medical and 5.0% for both dental and Medicare Part B by the year 2015. Increasing the assumed healthcare cost trend rate by one percentage point would increase the accrued postretirement benefit obligation by \$26,600 at December 31, 2009, and the net periodic postretirement benefit cost by \$1,100 for the year. A one-percentage-point decrease in the healthcare cost trend would decrease the accrued postretirement benefit obligation by \$25,000 at December 31, 2009, and the net periodic postretirement benefit cost by \$1,000 for the year.

Employee Health Insurance

The Company provides various health insurance plans for its employees, including a self-insured plan for its employees in the U.S.

8. Shareholders' Equity

Employee Stock Purchase Plan

Under the Company's First Employee Stock Purchase Plan (Plan), employees may apply up to 10% of their compensation to purchase the Company's common stock. Shares are purchased at the closing market price on the business day preceding the date of purchase. As of December 31, 2009, approximately 73,000 shares remain unissued under the Plan, of the total of 11.5 million shares that had been authorized under the Plan. During 2009, 2008, and 2007, approximately 23,000, 24,000, and 28,000 shares, respectively, were purchased under the Plan at an average price of \$4.97, \$4.80, and \$4.63 per share, respectively.

Shareholder Rights Plan

The Board of Directors adopted a Shareholder Rights Plan in January 1989 that was subsequently amended in 1999 to extend the expiration of the plan to November 2008. The plan expired in 2008 as it was not renewed.

Stock Trusts

The Company maintains a Stock Employee Compensation Trust (SECT) to provide funding for existing employee stock plans and benefit programs. Shares of the Company's common stock are purchased by and released from the SECT by the trustee of the SECT at the request of the compensation committee of the Board of Directors. As of December 31, 2009, all shares remaining in the SECT were unallocated and, therefore, are not considered outstanding for purposes of calculating earnings per share.

SECT activity for the years ended December 31, 2009, 2008, and 2007 is as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
(amounts in thousands)			
Share balance at beginning of year	3,304	3,318	3,564
Shares released:			
Stock option plans	—	(8)	(131)
Employee Stock Purchase Plan	—	(6)	(28)
Restricted stock issuance	—	—	(87)
Share balance at end of year	<u>3,304</u>	<u>3,304</u>	<u>3,318</u>

During 1999, the Company created an Omnibus Stock Trust (OST) to provide funding for various employee benefit programs. During 1999, the OST purchased 59,000 shares of the Company's common stock for \$1.0 million. Shares of the Company's common stock are released from the OST by the trustee at the request of the compensation committee of the Board of Directors. During 2009, 2008, and 2007, no shares were purchased or released by the OST.

Preferred Stock

At December 31, 2009 and 2008, the Company has 2,500,000 shares of par value \$0.01 preferred stock authorized for issuance, but none outstanding.

9. Equity-Based Compensation

The Company issues stock options and restricted stock in exchange for employee and director services. In accordance with current accounting standards, the calculated cost of its equity-based compensation awards is recognized in the Company's consolidated statements of income over the period in which an employee or director is required to provide the services for the award. Compensation cost will not be recognized for employees or directors that do not render the requisite services. The Company recognizes the expense for equity-based compensation in its consolidated income statements on a straight-line basis based upon awards that are ultimately expected to vest.

Equity-based compensation expense, tax benefit and net after tax cost for 2009, 2008 and 2007 are as follows:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
(amounts in thousands)			
Equity-based compensation	\$1,447	\$991	\$863
Tax benefit	<u>512</u>	<u>353</u>	<u>294</u>
Net expense	<u>\$ 935</u>	<u>\$638</u>	<u>\$569</u>

On April 26, 2000, the shareholders approved the Company's 2000 Equity Award Plan (Equity Plan). Under the provisions of the Equity Plan, stock options, restricted stock, stock appreciation rights, and other awards may be granted or awarded to employees and directors of the Company. The compensation committee of the Board of Directors determines the nature, amount, pricing, and vesting of the grant or award. All options and awards remain in effect until the earlier of the expiration, exercise, or surrender date. Options generally become exercisable in three or four equal annual installments, beginning one year from the date of grant. In certain limited instances, options granted at fair market value are expected to vest nine and one-half years from the date of grant. A total of 5,150,000 shares may be awarded under this plan, and 365,818 shares are available for grant as of December 31, 2009.

On April 24, 1991, the shareholders approved the Company's 1991 Employee Stock Option Plan (1991 Plan). Under the provisions of the 1991 Plan, options may be granted to employees and directors of the Company. The exercise price for options granted under this plan is equal to or greater than the fair market value of the Company's common stock on the date the option is granted. Incentive stock options generally become exercisable in four annual installments of 25% of the shares covered by the grant, beginning one year from the date of grant, and expire six years after becoming exercisable. Nonqualified stock options generally become exercisable in either four or five annual installments of 25 or 20%, respectively, of the shares covered by the grant, beginning one year from the date of grant, and expire up to 15 years from the date of grant. All options remain in effect until the earlier of the expiration, exercise, or surrender date. There are no options available for grant under this plan as of December 31, 2009.

Under the Company's 1991 Restricted Stock Plan, a total of 800,000 shares of restricted stock may be granted to certain key employees, and 615,750 shares are available for grant as of December 31, 2009.

The Company utilizes the Black-Scholes option-pricing model to estimate the fair value of stock options granted on the date of grant. The per-option weighted-average fair value on the date of grant of stock options granted in 2009, 2008, and 2007 was \$2.01, \$1.61, and \$1.72, respectively. The fair value of the options at the date of grant was estimated using the following weighted-average assumptions for the years ended December 31, 2009, 2008 and 2007:

	<u>2009</u>	<u>2008</u>	<u>2007</u>
Expected life (years)	3.4	3.3	3.4
Dividend yield	0.0%	0.0%	0.0%
Risk-free interest rate	1.8%	3.2%	4.7%
Expected volatility	58.4%	42.0%	47.4%

The Company used historical volatility calculated using daily closing prices for its common stock over periods that match the expected term of the option granted to estimate the expected volatility for the grants made in 2007, 2008 and 2009. The risk-free interest rate assumption was based upon U.S. Treasury yields appropriate for the expected term of the Company's stock options based upon the date of grant. The expected term of the stock options granted was based upon the options expected vesting schedule and historical exercise patterns. The expected dividend yield was based upon the Company's recent history of paying dividends, and the expectation of paying dividends in the foreseeable future.

During 2007, 2008 and 2009, the Company issued restricted stock to certain employees and its independent directors. For the employees, the stock vests over a period of four years, with 25% of the stock issued vesting one year from the date of grant, and another 25% vesting each year thereafter until the stock is fully vested. The Company is recognizing compensation expense for these shares ratably over the expected term of the restricted stock, or four years. For the independent directors, the issued stock vests at retirement. As the directors are eligible for retirement from the Company's Board of Directors at any point, the Company recognized the expense associated with these shares on the date of grant. The shares of restricted stock issued are considered outstanding, and are eligible to receive dividends, if any are paid, and can be voted. However, only vested shares of outstanding restricted stock are included in the calculation of basic earnings per share.

As of December 31, 2009, total remaining stock-based compensation expense for non-vested equity-based compensation is approximately \$1.7 million, which is expected to be recognized on a weighted-average basis over the next 16 months. Historically, the Company has issued shares out of treasury stock and its SECT to fulfill the share requirements from stock option exercises and restricted stock grants.

A summary of stock option activity under the Equity Plan and 1991 Plan is as follows:

	Equity Plan Options	Weighted- Average Exercise Price	1991 Plan Options	Weighted- Average Exercise Price
Outstanding at December 31, 2006	3,348,875	\$3.91	652,826	\$12.55
Granted	475,500	\$4.52	—	—
Exercised	(87,750)	\$3.83	(42,750)	\$ 2.87
Canceled and forfeited	(122,750)	\$4.58	(60,875)	\$21.74
Expired	—	—	(65,654)	\$20.18
Outstanding at December 31, 2007	3,613,875	\$3.97	483,547	\$11.21
Granted	395,300	\$4.90	—	—
Exercised	(199,422)	\$4.03	(23,500)	\$ 3.07

1991 Plan				
\$2.88	10,125	\$ 2.88	1.3	\$ 51,992
\$5.13 – \$6.13	200,136	\$ 5.96	4.2	\$ 409,579
\$16.19 – \$21.94	36,958	\$17.94	2.3	\$ —
\$26.06 – \$30.31	17,820	\$28.69	3.4	\$ —
	<u>265,039</u>	<u>\$ 9.04</u>	<u>3.8</u>	<u>\$ 461,571</u>

The aggregate intrinsic values as calculated in the above charts are based upon the Company's closing stock price on December 31, 2009 of \$8.01 per share.

10. Significant Customer

International Business Machines (IBM) is the Company's largest customer. In 2009, 2008, and 2007, IBM accounted for \$71.2 million or 25.8%, \$108.3 million or 30.6%, and \$96.0 million or 29.5% of the Company's consolidated revenue, respectively. The Company's accounts receivable from IBM at December 31, 2009 and 2008 amounted to \$9.7 million and \$8.5 million, respectively. The Company expects to continue to derive a significant portion of its revenue from IBM in 2010 and in future years. However, a significant decline in revenue from IBM would have a significant negative effect on the Company's revenue and profits. No other customer accounted for more than 10% of revenue in 2009, 2008, or 2007.

11. Contingencies

The Company and its subsidiaries are involved from time to time in various legal proceedings and tax audits arising in the ordinary course of business. At December 31, 2009 and 2008, the Company is in discussion with various governmental agencies relative to tax matters, including income, sales and use, and property and franchise taxes. The outcome of these audits and legal proceedings, if any, involving the Company and its subsidiaries cannot be predicted with certainty, and the amount of any liability that could arise with respect to such audits cannot be accurately predicted. As management has made an estimate of its potential liability for these audits at December 31, 2009 and 2008, the Company does not expect the conclusion of these matters to have a material adverse effect on the financial position, results of operations, or cash flows of the Company.

12. Enterprise-Wide Disclosures

The Company operates in one industry segment, providing information technology (IT) services to its clients. The services provided include strategic and flexible staffing and the planning, design, implementation, and maintenance of comprehensive IT solutions. All of the Company's revenue is generated from these services. CTG's reportable information is based on geographical areas. The accounting policies of the individual geographical areas are the same as those described in note 1, "Summary of Significant Accounting Policies."

** During the 2008 fourth quarter, the Company recorded a net foreign currency exchange gain on intercompany balances totaling approximately \$0.5 million on balances settled during the quarter and those balances outstanding between its subsidiaries at December 31, 2008.

Item 9. *Changes in and Disagreements with Accountants on Accounting and Financial Disclosure*

None.

Item 9A. *Controls and Procedures*

Evaluation of Disclosure Controls and Procedures

The Company's management has evaluated, under the supervision and with the participation of the Company's Chief Executive Officer and Chief Financial Officer, the effectiveness of the design and operations of the Company's disclosure controls and procedures (as defined in Rule 13a-15(e) of the Securities Exchange Act, as amended) as of the end of the period covered by this annual report. Based on that evaluation, the Company's Chief Executive Officer and Chief Financial Officer have concluded that the Company's disclosure controls and procedures were effective as of the end of the period covered by this annual report.

(a) *Management's Annual Report on Internal Control Over Financial Reporting*

The Company's management is responsible for establishing and maintaining an adequate system of internal control over financial reporting. Internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (ii) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, a system of internal control over financial reporting can provide only reasonable assurance and may not prevent or detect misstatements. Therefore, even those systems determined to be effective can provide only reasonable assurance with respect to financial statement preparation and presentation. Further, because of changes in conditions, effectiveness of internal control over financial reporting may deteriorate.

Management of the Company conducted an evaluation of the effectiveness of the Company's internal control over financial reporting based on the *Internal Control-Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. Based on that evaluation, the Company's management did not identify any control deficiencies it considered to be material weaknesses under the rules specified by the Public Company Accounting Oversight Board's Auditing Standard No. 5, and therefore concluded that its internal control over financial reporting was effective as of December 31, 2008.

Our independent registered public accounting firm has issued an attestation report on the Company's effectiveness of internal control over financial reporting. Their report appears in Item 9A (b), Attestation Report of the Registered Public Accounting Firm.

(b) Attestation Report of the Registered Public Accounting Firm

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Computer Task Group, Incorporated:

We have audited Computer Task Group, Incorporated's internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission (COSO). Computer Task Group, Incorporated's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting, included in the accompanying Management's Annual Report on Internal Control Over Financial Reporting (Item 9A(a)). Our responsibility is to express an opinion on the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, assessing the risk that a material weakness exists, and testing and evaluating the design and operating effectiveness of internal control based on the assessed risk. Our audit also included performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinion.

A company's internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our opinion, Computer Task Group, Incorporated maintained, in all material respects, effective internal control over financial reporting as of December 31, 2009, based on criteria established in *Internal Control—Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We also have audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheets of Computer Task Group, Incorporated as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2009, and our report dated February 25, 2010 expressed an unqualified opinion on those consolidated financial statements.

/s/ KPMG LLP

Buffalo, New York
February 25, 2010

(c) Changes in Internal Control Over Financial Reporting

The Company continues to review, revise and improve the effectiveness of the Company's internal controls on a continuous basis. The Company's management, including its Chief Executive Officer and Chief Financial Officer, evaluated the effectiveness of the Company's internal control over financial reporting as of the end of the period covered by this annual report. There were no changes in the Company's internal control over financial reporting that occurred during the period covered by this annual report, which ended on December 31, 2009, that materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

Item 9B. *Other Information*

None

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The information required in response to this item is incorporated herein by reference to the information set forth under “Election of Directors,” “Section 16(a) Beneficial Ownership Reporting Compliance,” “The Board of Directors and Committees” in relation to the “Audit Committee” subsection, and “Corporate Governance and Website Information” in the Company’s Proxy Statement for the Annual Meeting of Stockholders scheduled to be held on May 12, 2010 (Proxy Statement) to be filed with the SEC not later than 120 days after the end of the year ended December 31, 2009, except insofar as information with respect to executive officers is presented in Part I, Item 1 of this report pursuant to General Instruction G(3) of Form 10-K.

Item 11. Executive Compensation

The information required in response to this item is incorporated herein by reference to the information under the caption “The Board of Directors and Committees” and “Compensation Discussion and Analysis” presented in the Proxy Statement.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

Except as set forth below, the information required in response to this item is incorporated herein by reference to the information under the caption “Security Ownership of the Company’s Common Shares by Certain Beneficial Owners and by Management” presented in the Proxy Statement.

The following table sets forth, as of December 31, 2009, certain information related to the Company’s compensation plans under which shares of its common stock are authorized for issuance:

Equity Compensation Plan Information as of December 31, 2009

	<u>Number of securities to be issued upon exercise of outstanding options, warrants and rights</u>	<u>Weighted-average exercise price of outstanding options, warrants and rights</u>	<u>Number of securities remaining available for future issuance under equity compensation plans</u>
<i>Equity compensation plans approved by security holders</i>			
2000 Equity Award Plan	3,698,817	\$4.14	365,818
1991 Employee Stock Option Plan . .	265,039	\$9.04	—
1991 Restricted Stock Plan	—	—	615,750
<i>Equity compensation plans not approved by security holders</i>			
None	—	—	—
Total	<u>3,963,856</u>	<u>\$4.47</u>	<u>981,568</u>

At December 31, 2009, the Company did not have any outstanding rights or warrants. All outstanding awards are either stock options or restricted stock.

Item 13. *Certain Relationships and Related Transactions, and Director Independence*

The information required in response to this item is incorporated herein by reference to the information under the caption “Certain Relationships and Related Person Transactions, and Director Independence” presented in the Proxy Statement.

Item 14. *Principal Accountant Fees and Services*

The information required in response to this item is incorporated herein by reference to the information under the caption “Appointment of Auditors for Fiscal 2009 and Fees” presented in the Proxy Statement.

PART IV

Item 15. *Exhibits and Financial Statement Schedule*

(B) *Exhibits*

The Exhibits to this annual report on Form 10-K are listed on the attached Exhibit Index appearing on pages 67 to 69.

Report of Independent Registered Public Accounting Firm

The Board of Directors and Shareholders
Computer Task Group, Incorporated:

Under date of February 25, 2010, we reported on the consolidated balance sheets of Computer Task Group, Incorporated and subsidiaries as of December 31, 2009 and 2008, and the related consolidated statements of income, changes in shareholders' equity, and cash flows for each of the years in the three-year period ended December 31, 2009, which are included in the Form 10-K. In connection with our audits of the aforementioned consolidated financial statements, we also audited the related consolidated financial statement schedule as listed in the accompanying index. This financial statement schedule is the responsibility of the Company's management. Our responsibility is to express an opinion on this financial statement schedule based on our audits.

In our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

CERTIFICATION

I, James R. Boldt, certify that:

1. I have reviewed this report on Form 10-K of Computer Task Group, Incorporated;
2. Based on my knowledge, this report does not contain any untrue statement of a material fact or omit to state a material fact necessary to make the statements made, in light of the circumstances under which such statements were made, not misleading with respect to the period covered by this report;
3. Based on my knowledge, the financial statements, and other financial information included in this report, fairly present in all material respects the financial condition, results of operations and cash flows of the registrant as of, and for, the periods presented in this report;
4. The registrant's other certifying officer and I are responsible for establishing and maintaining disclosure controls and procedures (as defined in Exchange Act Rules 13a-15(e) and 15d-15(e)) and internal control over financial reporting (as defined in Exchange Act Rules 13a-15(f) and 15d-15(f)) for the registrant and have:
 - a. designed such disclosure controls and procedures, or caused such disclosure controls and procedures to be designed under our supervision, to ensure that material information relating to the registrant, including its consolidated subsidiaries, is made known to us by others within those entities, particularly during the period in which this report is being prepared;
 - b. designed such internal control over financial reporting, or caused such internal control over financial reporting to be designed under our supervision, to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles;
 - c. evaluated the effectiveness of the registrant's disclosure controls and procedures and presented in this report our conclusions about the effectiveness of the disclosure controls and procedures, as of the end of the period covered by this report based on such evaluation; and
 - d. disclosed in this report any change in the registrant's internal control over financial reporting that occurred during the registrant's most recent fiscal quarter (the registrant's fourth quarter in the case of an annual report) that has materially affected, or is reasonably likely to materially affect, the registrant's internal control over financial reporting; and
5. The registrant's other certifying officer and I have disclosed, based on our most recent evaluation of the internal control over financial reporting, to the registrant's auditors and the audit committee of registrant's board of directors (or persons performing the equivalent functions):
 - a. all significant deficiencies and material weaknesses in the design or operation of internal control over financial reporting which are reasonably likely to adversely affect the registrant's ability to record, process, summarize and report financial information; and
 - b. any fraud, whether or not material, that involves management or other employees who have a significant role in the registrant's internal control over financial reporting.

CERTIFICATION

**PURSUANT TO SECTION 906 OF THE SARBANES-OXLEY ACT OF 2002
(Subsections (a) and (b) of Section 1350, Chapter 63 of Title 18, United States Code)**

Pursuant to Section 906 of the Sarbanes-Oxley Act of 2002 (subsections (a) and (b) of Section 1350, Chapter 63 of Title 18, United States Code), each of the undersigned officers of Computer Task Group, Incorporated, a New York corporation (the "Company"), does hereby certify with respect to the Annual Report of the Company on Form 10-K for the year ended December 31, 2009 as filed with the Securities and Exchange Commission (the "Form 10-K") that:

- (1) the Form 10-K fully complies with the requirements of Section 13(a) or 15(d) of the Securities Exchange Act of 1934; and
- (2) the information contained in the Form 10-K fairly presents, in all material respects, the financial condition and results of operations of the Company.

A signed original of this written statement required by Section 906 has been provided to Computer Task Group, Incorporated and will be retained by Computer Task Group, Incorporated and furnished to the Securities and Exchange Commission or its staff upon request.

Forward-looking Information

This annual report contains forward-looking statements by management and the Company that are subject to a number of risks and uncertainties. The forward-looking statements contained in the report are based on information as of the date of this report. The Company assumes no obligation to update these statements based on information from and after the date of this report. Generally, forward-looking statements include words or phrases such as "anticipates," "believes," "estimates," "expects," "intends," "plans," "projects," "could," "may," "might," "should," "will," and words and phrases of similar impact. The forward-looking statements include, but are not limited to, statements regarding future operations, industry trends or conditions and the business environment, and statements regarding future levels of, or trends in, revenues, operating expenses, capital expenditures, and financing. The forward-looking statements are made pursuant to safe harbor provisions of the Private Securities Litigation Reform Act of 1995. Numerous factors could cause actual results to differ materially from those in the forward-looking statements, including the following: (i) industry and economic conditions, including fluctuations in demand for IT services, (ii) the availability to us of qualified professional staff, (iii) domestic and foreign industry competition for customers and talent, (iv) rate and wage inflation or deflation, (v) risks associated with operating in foreign jurisdictions, (vi) the impact of current and future laws and government regulation, as well as repeal or modification of same, affecting the IT solutions and staffing industry, taxes, and the Company's operations in particular, (vii) renegotiations, nullification, or breaches of contracts with customers, vendors, subcontractors, or other parties, (viii) consolidation among the Company's competitors or customers, (ix) the partial or complete loss of the revenue the Company generates from IBM, (x) the need to supplement or change our IT services in response to new offerings in the industry, and (xi) the risks described elsewhere herein and from time to time in the Company's reports filed with the Securities and Exchange Commission.
