## Dedicated to Customer Missions. Trusted With National Priorities.

For over 50 years, CACI has been dedicated to serving our customers' critical missions. We specialize in the combination of technological prowess and professional and domain expertise that delivers enduring value to our defense, intelligence, and federal civilian customers. Our success has been built on a foundation of good character, innovation, and commitment. We are extremely proud of the trust our customers place in us to support them in missions of national importance.

Over the last several years, CACI has been executing on a three-part strategy: win new business, deliver operational excellence, and deploy our capital for long-term growth opportunities. Pursuing this strategy has led us to make a number of significant, strategic changes to our business. We aligned our organization to better meet the requirements of our addressable market, increase internal synergies, and enhance operational efficiency. We transformed our business development approach to pursue larger, more solutions-oriented contracts where we can compete on ideas and deliver outcomes that advance customer missions. These changes have resulted in a stronger, more effective organization and a record \$5.77 billion in contract awards for the year.

We are also extremely proud to have been named one of *Fortune* magazine's "World's Most Admired Companies" in the Information Technology Services industry. This is the second consecutive year, and fifth time overall, that CACI has been named to this prestigious list, which *Fortune* describes as "the definitive report card

on corporate reputations.” To compile the list, *Fortune* surveys thousands of top company executives and directors to identify companies that have the strongest reputations within their industries. Our position on the list affirms the important role that good character and integrity play in our business success.

Our achievements over the last year are built on our company-wide commitment to integrity and good character. Every day, we live the culture that has guided us for more than 50 years. We are dedicated to our customers’ missions; to doing every job to the best of our ability; to good character, mutual respect, and trust among ourselves and our customers; and to ethics and integrity in all we do.

for our customers and shareholders*

# CACI SHAREHOLDERS

During Fiscal Year 2015, we applied the experience we gained from navigating a challenging market environment over the past several years and refined the execution of our growth strategy to lay a solid foundation for CACI's future. Our results for the year demonstrate the success of the changes we made, and show that we are well-positioned to return to organic revenue and net income growth in FY16, and to continue to deliver long-term shareholder value.

We made deliberate, considered changes to how we approach our business in response to how a constrained fiscal environment was affecting our customers' buying behavior. We reorganized and aligned our operations to fit our market more closely, develop internal synergies, sharpen our competitive edge, and increase our operational efficiency.

Throughout the year, we won new business and retained our core business by driving excellence, innovation, and value into our program delivery. We transformed our business development approach, refining our bid selection to pursue larger, more solutions-oriented opportunities. In focusing more on solutions, we are competing on ideas and outcomes that deliver the best possible value and support to our customers, while also pursuing and winning higher-margin business.

Altogether, the changes we have made enabled us to win a record amount of contract awards, build our backlog of

business to its highest-ever level, and increase our cash flow. These changes are also helping us capture a larger share of our market, demonstrating the value of our long-term thinking. Furthermore, we realized these results despite the impact of delays in awards and protests of new business that we won.

Our United Kingdom operations continued to build their base of business, delivering another year of record revenue and net income. We have been recognized there as a market-leading provider of digital services. Econsultancy, a global publisher focused on best practice digital marketing and e-commerce, has ranked CACI 16th out of the top 100 digital agencies in the UK overall and 11th within the top marketing agencies category specifically.

As we entered FY16, our forward indicators were strong. Our funded backlog was over \$2 billion, almost 30 percent greater than a year earlier. Our total backlog was almost \$9.6 billion, 35 percent greater than a year ago. Nearly 93 percent of our planned revenue for FY16 will come from contracts on which we currently perform. In addition, we had \$12 billion in submitted proposals under evaluation. Almost 50 percent of those bids are new business for CACI.

## Positioning for the Long Term

Looking ahead, we believe there is ample opportunity for CACI to grow in the markets we serve, even as that environment remains challenging. Our

customers' requirements have been, and will continue to be, shaped by a complex set of international and domestic priorities.

Internationally, diverse, emerging, and increasingly sophisticated threats levy new requirements on our customers in the defense and intelligence communities. Domestically, fiscal constraints require that our government customers continue to transform how they conduct business and become more efficient. This includes protecting their networks and valuable data from almost daily cyber attacks.

From the battlefield to the national level, CACI's command of technology, mission understanding, and domain expertise enables us to provide the affordable, high-end solutions and services our defense, intelligence, and federal civilian customers require. Demand continues to grow across our markets for the solutions we offer that help deliver government services, protect information, and defend the country.

We believe the highly relevant and innovative work we perform will support our growth. Detailed examples of our work and accomplishments can be found in the following pages. A few significant areas of innovation, among many, include improving cyber resilience and helping keep valuable data secure; combining traditional cyber security expertise with unique signals intelligence capabilities to defend both new and legacy platforms; and electronically managing health

information to transform the delivery of patient care in support of modernizing our nation's healthcare system.

As a result of our dedication to our customers' missions, we have built a strong competitive position that we believe will drive future returns. In FY16, it will contribute to our anticipated net income growth and strong cash flow. Stronger cash flow will, in turn, power our deployment of capital both internally and for strategic acquisitions that help us expand our customer base, build more robust capabilities in enduring and emerging mission areas, and deliver long-term shareholder value.

## **Our Most Valuable Asset – Our People**

Our accomplishments in FY15 and our strong foundation for FY16 and beyond are a direct result of the commitment to integrity and good character by CACI's dedicated professionals. Every day, they support our customers with their exceptional capabilities. Their dedication to our customers' missions and to delivering excellent performance at all times is critical to our success and to the growth of our company. We thank them for their continuing achievements. They are the ultimate reason for our company's success. We also thank you, our fellow shareholders, for your continued support.

## **CACI's Significant Accomplishments in Fiscal 2015:**

- Revenue of \$3.31 billion
- Operating income of \$236.4 million
- Net income attributable to CACI of \$126.2 million
- Diluted earnings per share of \$5.17
- Operating cash flow of \$223.2 million
- Contract awards of \$5.77 billion
- Contract funding orders of \$3.76 billion
- Funded backlog at fiscal year-end of \$2.05 billion
- Total backlog at fiscal year-end of \$9.57 billion

# CACI

EVER VIGILANT

CACI leverages intelligence analysis to support decision-making at every level

## A Trusted National Security Partner

Throughout our history, CACI has been dedicated to our customers' missions, always seeking new and innovative ways to help our customers achieve their critical tasks. Driven by our dedication, we have grown into a trusted provider of solutions and services across the full spectrum of defense, intelligence, and federal civilian missions. We combine powerful technology with ingenuity and deep domain expertise to meet our customers' critical mission objectives.

### Deep Expertise Supporting a Range of National Security Missions

The world we live in is a dangerous place. Rogue nations, peer states, and terrorist organizations all vie for power and preeminence, and decision-makers at every level require real-time information and analysis to ensure the country's security. CACI serves this critical national mission with an extensive range of capabilities in counterintelligence, geospatial intelligence, analysis, tradecraft, and unique, high-end signals intelligence solutions that ensure America's Intelligence Community and military can stay ahead of threats wherever, and whenever, they emerge.

One of the most serious emerging threats facing the United States and its allies is in electronic warfare. CACI's cyber solutions combine our unique expertise in signals intelligence and digital signals processing with

traditional cyber security methods to deliver full-spectrum electromagnetic defense and exploitation. For the last five years, our high-end solutions in cyber security have supported mission activities in counterterrorism and signals intelligence. This mission area has only continued to grow in importance and scope.

In April, we were awarded a contract to continue our support for a multi-intelligence source fusion analytics platform. Our expertise in cyber and signals intelligence, which supports this work, leverages data so analysts can better identify threats and targets. We also support the precision geolocation efforts that are vital to ensuring operations that include border security and high-value target acquisition.

### Delivering a Decisive Information and Material Edge on a Dynamic Battlefield

CACI's innovative solutions for command and control, communications, computers, intelligence, surveillance, and reconnaissance (C4ISR) deliver a decisive edge on the battlefield. Our solutions help military leaders and soldiers on the ground identify possible targets from remote distances, as well as maintain early warning and detection systems that keep America's servicemen and women safe.

CACI's support for national defense includes human expertise as well. Our highly qualified subject matter experts in national security planning and

**CACI's logistics expertise helps load cargo jets  
with essential supplies for soldiers in the field**

strategy, special operations forces, and the geopolitics of asymmetric warfare have been essential in supporting the U.S. Special Operations Command's (SOCOM) emerging Campaign Plan for Global Special Operations. CACI's experts have provided crucial support as authors and coordination facilitators of these key strategic documents that lay the groundwork for SOCOM's continued evolution in addressing the security challenges persistent in asymmetric, irregular, and emerging threats.

CACI experienced growth in airborne intelligence, surveillance, and reconnaissance (ISR). We were selected to provide flight operations augmenting airborne ISR missions in Afghanistan. Since late 2014, CACI has flown over 2,300 of these missions that support U.S. and coalition operations there. We have established ourselves as a leading provider of this service to U.S. combat operations.

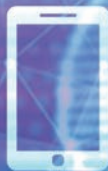

We continued our decades-long support for the U.S. Army's Intelligence and Security Command (INSCOM), winning a prime position to provide a range of intelligence services that include C4ISR

and Big Data management and analytics. The contract award reflects CACI's long history with INSCOM and the Army's confidence in our ability to rapidly deploy responsive solutions that meet its mission requirements.

Logistics and material readiness may not be front-page news, but it is a vital component of America's ability to respond to any situation. Our logistics professionals are experts in identifying, procuring, and delivering vital spare parts to our troops where and when they are required. We also provide analytical support, helping ensure that our customers keep the right parts in stock at the right time. The Navy and Marine Corps depend on our day-to-day, over-the-shoulder support to make sure that their material readiness is sustained at the highest possible levels. ■

**Our experts deliver critical analysis to protect our nation from asymmetric, irregular, and emerging threats**

**Our deep mission understanding, subject matter expertise, and high-end technological prowess support national security, from the tactical edge to national strategic planners and decision-makers**

## Transforming How Government Does Business

The requirement for efficiency, security, and real-time information is not limited to the battlefield. Government at every level must balance declining budgets with political demands for efficiency and cost savings, while still delivering the highest quality services to citizens. To meet this requirement for transformation, federal decision-makers are modernizing: replacing outdated legacy systems with newer, more secure and efficient technologies and consolidating systems for multiple agencies into a single entity.

Our enterprise IT solutions amplify the speed and security of government computing

### Delivering Seamless, Secure, Agile IT Infrastructures

More than 50 government agencies rely on CACI to design, implement, and sustain cutting-edge enterprise information technology. Our highly qualified personnel and innovative, cost-effective solutions deliver cloud-computing technology, managed services, and workforce augmentation services that provide modern, efficient, and secure IT services for federal agencies.

This year, we expanded our presence in this market, winning the opportunity to provide desktop support for the Department of Homeland Security headquarters. This work represents a strategic move for CACI into higher-value managed services. CACI is evolving beyond simply providing our talented professionals to the government to managing and delivering the outcomes our customers require.

### Optimizing Systems to Improve Efficiency and Expand Capabilities

Over the course of the past year, CACI has continued to support our government customers in modernizing the large enterprise financial, administrative, material, and personnel systems used to manage the day-to-day business of government. One of our signature achievements was winning the U.S. Army's Integrated Personnel and Pay System contract. Choosing to draw on our record of success

**CACI drives technological evolution to transform  
how the government does business**

implementing complex business systems, and our unique technical solution, the U.S. Army selected CACI to build the largest personnel and pay system of its kind in the world, which will consolidate more than 40 legacy systems into the authoritative source of personnel information for over one million Active, Guard, and Reserve soldiers.

**Advancing the Interoperability  
and Efficacy of Health Systems**

Modernizing military and civilian healthcare systems is key to improving both the quality and access to healthcare while reducing cost. CACI is at the forefront of supporting efforts across the nation that improve healthcare delivery systems, integrate electronic

health records, enhance population health through advanced analytics, and improve emergency response through the use of sophisticated medical logistics.

This year, CACI supported both veteran and civilian healthcare. We continued our work for a federal agency charged with converting millions of pages of veterans' paper medical records into searchable electronic records. We also won the opportunity to help the Department of Health and Human Services streamline and improve the efficiency of the Medicare appeals process.

Our in-depth knowledge of DoD's business process also helps to deliver more efficient medical care for our troops through our support of the Theater →

**CACI supports the modernization  
and delivery of healthcare services to  
soldiers and civilians**

**We bring the right  
people, the right  
expertise, and the right  
technology to help  
defense, intelligence,  
and federal civilian  
customers become  
faster, more efficient,  
and more secure**

Our medical logistics experts ensure that inventory remains perpetually stocked

Enterprise-Wide Logistics System (TEWLS). We provide full configuration support, technical sustainment, and continued enhancement of TEWLS, which delivers a continuum of medical logistics support for the DoD's Defense Health Agency. TEWLS consolidates numerous military logistics functions into a single application and database, providing efficient, effective disbursement of necessary medical supplies to American soldiers.

### Applying Sophisticated Technologies to Cost-Effectively Win Cases

Our Digital Forensics Lab staff analyzes evidence for investigations, litigations, and security inquiries

Since 1978, CACI has provided the government's lawyers and regulators with investigation and litigation support services. We deliver support for every step in the litigation process, from discovery to trial. We also provide an ASCLD/LAB-accredited computer and audio/video forensics lab, and scalable, secure

SaaS cloud hosting. CACI solutions and innovations have helped the government win cases and led to billions of dollars in savings for taxpayers.

One of CACI's key differentiators in this area is our use of technology. We augment our professionals' abilities and expertise with our own high-end technology for computer forensics, eDiscovery, and cloud hosting. This helps lawyers and paralegals quickly sift through the mountains of data that accompany litigation, leading to faster case resolution and more taxpayer savings. ■

## A Powerful Combination of Technology and People, Supporting UK Government and Business

FY15 was a banner year for CACI in the UK. Following on last year's success, we again posted record revenue and net income. We also acquired Rockshore Group Ltd, an expert provider of software that lets organizations simplify complex data into user-friendly information in real time. This acquisition further extends the range of services we offer and enhances our growth in the telecommunications sector, now the largest sector that our UK operation supports.

The Central Statistics Office of the Republic of Ireland awarded us a significant contract to provide the data processing system for their 2016 Population Census. This work further cements our reputation and credibility in the census processing arena, having previously won, and successfully delivered, the 2001, 2006, and 2011 census contracts for Ireland, as well as the 2011 census contract for Scotland.

Finally, our digital marketing solutions business continued to grow. This year, that growth was supported by the development and launch of Email Studio, which embeds email marketing best practices into master branded templates. This enables a diverse range of customers to develop and deploy their own powerful email campaigns in-house. ■

With our Email Studio software, enterprises can create, track, and manage key email marketing campaigns

CACI's UK organization analyzes behavioral and demographic data to give customers actionable information

Our command of Big Data, analytics, and best practices supports government and commercial customers as they strive to provide improved services to their citizens and customers

# C H A R A C T E R

CACI is built on a culture of good character. It's not a line item on any of our contracts, but character is the single most important asset we bring to the job every day. We support our Defense, Intelligence, and Federal Civilian customers' most critical missions with CACI's world-leading information solutions and services. They count on us for honesty, integrity, commitment, and respect: qualities that define our character and build success.

**CACI**
