2003 Annual Report

Success

journey

At East West Bank, we create our road to success by balancing fundamentals and flexibility, insight and experience. In 2003, our continuing journey produced multiple rewards, opening new pathways for our customers and shareholders.

A TRACE STREET AND A STREET OF THE PROPERTY OF

planning

Each trip begins at the beginning, with the tools essential to reach our desired destination. For East West Bank, that road kit has always encompassed superior asset quality and consistent earnings growth. From the onset, our goal was to become one of the top-performing financial institutions in California and a premier commercial bank. Achieving that

goal has demanded careful planning and dedication to solid financial fundamentals. Our strategy yielded benefits again in 2003, when we rewarded shareholders with our seventh consecutive year of record earnings and the highest return on assets in Bank history.

2003 MILES	TONES

\$4.1 billion Assets	+22%
\$3.2 billion	+40%
\$362 million Stockholders' Equity	

CULVES.

COMMERCIAL BANKING

Our Business/Commercial units saw healthy increases in 2003, including:

Commercial Loans +26%

Commercial Deposits +18%

Real Estate Loans +58%

Trade Finance Loans +35%

The milestones that we continue to meet don't come from happenstance.

East West's consistent, conscientious approach to interest rate management and strict underwriting standards enabled

us not only to prepare for 2003 – one of

the most challenging economic environments for banks—but to turn in another stellar performance. As the fourth-largest commercial bank headquartered in Los Angeles, we represent a road well traveled for our commercial customers. They appreciate our responsive, relationship-based banking; knowledge of select niche markets; and established Pacific Rim connections—both here in California and throughout Asia.

Pacific Rim Connections

LANE

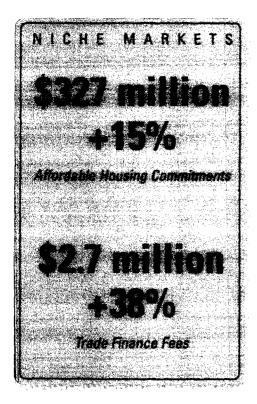

Welcome to California

Strong niche markets ahead

Responsive Service

crossing the best

Identifying the most opportune route often involves
a willingness to take intriguing side roads that prove
advantageous. We strategically target those niche markets
where we offer critical expertise and service: the seniors
and affordable housing segments of the construction

industry, trade finance, and small- to mid-sized businesses. Our capabilities dovetail with the entrepreneurial needs of businesses in California's thriving middle market, which represent 98% of the State's companies. East West also is opening up new opportunities internationally, as our links to Asia enable our customers to capitalize on expanding trade between the U.S. and China.

opportunities

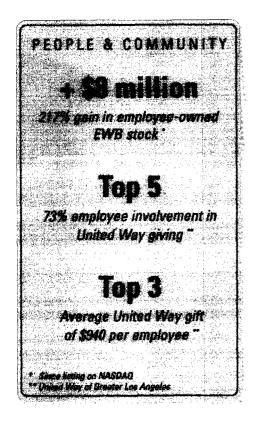

To travel wisely, never lose sight of your starting point. Our roots in the Chinese-American community represent a source of enduring strength. Many retail customers bring with them an entrepreneurial spirit and beneficial associations with Asian markets. We provide a bridge for these customers with greater access, convenience, and value. In addition to multi-lingual banking, that means extended hours, in-store supermarket banking, and exclusive promotions from mainstream U.S. companies. In doing so, we build customer loyalty, evidenced by our growth in retail deposits at year end to over \$ 2.0 billion.

where we're going

Early on, we foresaw the value in making our employees true partners in the Bank's success. Today, everyone who works here enjoys some form of ownership in East West, through our employee 401K savings plan, stock purchase plan, restricted stock, and

stock option grants. Not only are our people committed to East West, they're committed to the communities we serve. Among other activities, our employees participated in the Revlon Run/Walk for breast cancer research in 2003 and assisted low income, elderly, and disabled homeowners with home repairs during United Way's Commitment to Caring.

⁽¹⁾ Excludes the amortization of intangibles and investments in affordable housing partnerships.

Our 2003 annual report, "Road to Success," reflects not only on the substantial performance of our seventh consecutive year of record earnings, but the ways in which we made that success happen.

This past year marked the 30th anniversary of East West, a period of great accomplishments and a rewarding journey for our shareholders, employees, and customers. As with any trip, you begin with a goal or destination in mind. At East West, our destination has always been to become one of the premier financial institutions in the nation by creating dominant market positions in selected niche markets and rewarding shareholders with sustainable earnings growth, consistently high asset quality, and strong capital ratios. In doing so, we've become one of the most respected, full-service banking franchises in California.

At the same time, we believe that the way in which we reach our goals is equally important. Lasting achievement requires careful planning, recognition of your strengths and opportunities, the preparation to best manage changing conditions, and a commitment to the highest level of integrity, dedication, and service to community, employees and shareholders. In this year's report, we provide an overview of the critical components on our road to

success, and how these contribute to shareholder value and to strength in our banking franchise. By emphasizing solid capital levels, minimal non-performing assets, and a growing allowance for loan losses, we have been able to build the strongest balance sheet in our history. This approach allowed us to comfortably support asset growth in 2003 as we capitalized on opportunities we identified. With a careful focus on our exposure to changing interest rates and growth in our low-cost deposit base, we were able to offer a wider range of lending products, including longer-term fixed-rate loans, without raising our interest rate risk profile. The bottom line: better services to existing clients and an enhanced ability to attract new clients.

The historically low interest rate environment posed a challenge for many banks during 2003, creating intense pressure on net interest margins throughout the industry. However, East West generated the highest net interest income in our history in 2003, thanks to our

longstanding goal of driving higher levels of core deposits, which made significant contributions to our overall earnings growth. This and many other actions speak to the wisdom of maintaining a well-crafted plan as we continue our journey.

We passed many milestones in 2003, including the highest return on average assets in our history, strong growth in loans and core deposits, and sustained high asset quality levels. Net income for the year achieved a record \$59.0 million, while earnings per share grew by 18% to \$2.38, also a record. We generated a return on average assets of 1.64% for the year, the highest ratio in our history. We regard ROA as a true indicator of our ability to drive value from our operations and consider this year's figure further affirmation of our growth strategies. Among the year's other financial highlights were:

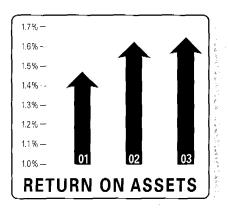

- Return on average equity of 18.12%
- Total year-end assets of \$4.1 billion, a 22% increase over 2002
- Record total deposits of \$3.3 billion, a 13% increase
- Total core deposits of \$1.8 billion, a 28% increase
- Record \$32.8 million in non-interest income
- Record total equity of \$362 million and a Tier I leverage ratio of 9.13%
- Non-performing assets only 0.16% of total assets, compared to 0.37% in 2002
- Net charge-offs of only 0.06%, lowest level in 15 years

Operational Highlights

These substantial financial accomplishments speak not just to a single year's performance, but to our continuing evolution. Each year of record earnings and financial performance serves to fuel the years ahead. In the same way, our operational highlights for 2003 lay the foundation for further gains in 2004 and beyond. One of the more notable developments in the year past was our loan growth of 40%, or nearly \$930 million. Contributing to one of the nation's best loan growth performances were our expanding relationships throughout California, the addition of seasoned banking professionals, and the introduction of customer-focused, solutions-oriented loan products.

We also continued to build a strong, stable low-cost deposit franchise, growing our core deposits by 28%, or over \$390 million, and further lowering our total cost of deposits to 0.98%, our lowest-ever level. Of particular note was the distribution of deposit growth, with double-digit gains in every category of core deposits and market-share growth for both commercial and retail operations. Our focus on banking fundamentals, products and services that align with the needs of businesses and individuals, and responsive personal service form key aspects of the roadmap we follow. Together, they produced strong deposit growth during the year.

Looking back on two highlights from last year's letter – the opening of our Beijing office and the acquisition of Pacific Business Bank – I am happy to report that both initiatives brought positive rewards in 2003. As the only U.S-based bank to receive approval to open a Representative Office in China in 2002, we launched our operations early in 2003, another piece in our strategy to bridge East and West. We faced a slow start due to the SARS outbreak. However, we more than made up for the delay with a strong flow of

business throughout the remaining months of 2003. Our Beijing office focused primarily on generating letters of credit business through correspondent banking relationships, which contributed meaningfully to gains in letters of credit fee income that we reported and added to our overall lending business as we converted contacts into customers.

The acquisition of Pacific Business Bank (PBB) also proved advantageous, allowing us to further expand the small commercial business market. Shortly after closing this transaction in March of 2003, we effectively integrated the operations and immediately began to recognize benefits as the PBB team brought expanded lending and deposit capacity and products to their existing and new customer base.

Finally, no journey could be complete without looking forward to the next turn of the road. As we view our past successes, we are understandably proud of what we have accomplished, but we know that the real work lies in the trip to come. While our experience, skills, and reputation will serve us well as we move into 2004, we continue to reinvest in our platform and people to achieve an even stronger franchise.

During the coming year, we are planning a number of key initiatives designed to align ourselves even more closely with our core customer base, providing the types of products and services that give our clients the solutions they need, professionally and individually. Through these initiatives, we will continue building the financial strength that enables us to pursue prudent, profitable growth and expand our position as one of the most respected, capable full-service commercial banking franchises in California. We thank you for your continued support as we eagerly enter into our next 30 years, in the strongest financial position in our history and ready for the opportunities that lie ahead.

Sincerely,

Dominic Ng

President and CEO

To the Board of Directors and Stockholders of East West Bancorp, Inc. San Marino, California:

We have audited the consolidated balance sheets of East West Bancorp, Inc. and subsidiaries (the "Company") as of December 31, 2003 and 2002, and the related consolidated statements of income, changes in stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2003. Such consolidated financial statements and our report thereon dated March 8, 2004, expressing an unqualified opinion (which are not included herein) are included in the Company's Annual Report on Form 10-K for the year ended December 31, 2003 as filed with the Securities and Exchange Commission. The accompanying condensed consolidated financial statements on pages 20-25, which do not include footnotes that are an integral part of a complete set of financial statements, are the responsibility of the Company's management. Our responsibility is to express an opinion on such condensed consolidated financial statements in relation to the complete consolidated financial statements.

In our opinion, the information set forth in the accompanying condensed consolidated balance sheets as of December 31, 2003 and 2002, and the related condensed consolidated statements of income, changes in stockholders' equity and cash flows for each of the three years in the period ended December 31, 2003 is fairly stated in all material respects in relation to the basic consolidated financial statements from which it has been derived.
